Attn: NEC Member

Standardization Studies - Atomic Warfare

1. The Canadian Army comments and informal position on each of the studios listed in Inclosure 1 to Department of the Army letter OPS CD DC 3 dated 17 Feb 61 are contained in ANNEXES 'A' to 'H' attached.

2. It is recommended that these studies be released to NATO as a "package", or, in "packages" which contain related, cross-referenced studies, eg, A37 should be accompanied by A34 and D18.

3. On the assumption that these studies will be redrafted before submission to NATO, it is suggested that references to US publications (FMs and DA Pamphlets) be replaced where possible by references to NATO publications, because US reference publications will not be available to other NATO countries. In addition, the studies should also be coordinated with existing NATO studies and draft STANAGs before submission.

ABC Non-Material Standardization
SCLOG A-38 Employment of Atomic Demolitions

1. Reference SCLOG Agreement A-38, Employment of Atomic Demolition Munitions, two folios down.
2. The US Army have drafted this document and they are the experts in the ABC Organization on the detailed employment of this special demolition munition. Canada is not in a position to add anything to what has been drafted.
3. At present Canada does no training on ADMs but, in the event that such training will be done in the future, this SCLOG Agreement would be useful and would be followed.
4. Accordingly, the Chief Engineer's office recommends that we concur in this draft SCLOG Agreement.
