Re: Manitoulin Island Reserve #26

Dear Sirs:

Your tender dated May 1st, of $9,502.55, for a Permit for Parcel B has been accepted by the Director.

The Permit contract will be drawn and forwarded in about a week. However, in the meantime, you may proceed with exploration of the area.

Yours truly,

W. C. Bethune,
Superintendent,
Reserves & Trusts.

Dear Sir,-

I appreciate very much receiving notice of the various areas being offered by your Department for Reservations. Please note my new address, as above.

Also, amonth or so go while I was in the Nursing homce following a termof hospitalization, I received notice from you of your offering of the Manitoulin Island Indian Reserve, I think the No. was 26, comprising the peninsula on the Est side of the mainland of the Island. We did some work in the area and I am interested to know if the three parcels were taken up. If they were taken up would you please advise me of the names and addresses of the purchasers of each of the three parcels. And oblidge,

Yours truly,

G. B. Grandy.

Re: Manitoulin Island Reserve No. 26

Dear Sirs:

Our letter of May 15th to you indicated the difficulty delaying our decision on the disposal of oil rights.

We had expected that this would have been determined by May 26th. However, we find that there is a further delay, and we now expect that this matter will be clarified to enable us to conclude the matter in another week.

Yours truly,

W. C. Bethune,

# CANADIAN NATIONAL TELEGRAPH COMPANY

(OPERATING ITS OWN LINES AND THOSE OF THE GREAT NORTH WESTERN TELEGRAPH COMPANY, THE GRAND TRUNK PACIFIC TELEGRAPH COMPANY AND CANADIAN GOVERNMENT RAILWAYS). HEREINAFTER CALLED THE COMPANY.

TERMS AND CONDITIONS UPON WHICH TELEGRAPH AND CABLE MESSAGES SHALL BE TRANSMITTED ARE PRESCRIBED BY ORDER NO. 49274, DATED DECEMBER 5TH, 1932, OF THE BOARD OF TRANSPORT COMMISSIONERS FOR CANADA AND PUBLISHED IN THE CANADA GAZETTE.

It is agreed between the sender of the message on the face of this form and this Company that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeated telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, for errors in cipher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.

To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate; and, in that case, the Company shall be liable for damages suffered by the sender to an extent not exceeding $200.00, due to the negligence of the Company in the transmission or delivery of the telegram.

Correctness in the transmission and delivery of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz.: one per cent for any distance not exceeding 1,000 miles, and two per cent for any greater distance.

This Company shall not be liable for the act or omission of any other Company, but will endeavour to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages unless the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the sender's agent; if by telephone, the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. This Company shall not be liable in any case for damages, unless the same be claimed, in writing, within sixty days after receipt of the telegram for transmission.

No employee of the Company shall vary the foregoing.

---

# LA "CANADIAN NATIONAL TELEGRAPH COMPANY"

(EXPLOITANT SES PROPRES LIGNES DE MÊME QUE CELLES DE LA "GREAT NORTH WESTERN TELEGRAPH COMPANY", DE LA GRAND TRUNK PACIFIC TELEGRAPH COMPANY" ET CELLES DES CHEMINS DE FER DU GOUVERNEMENT CANADIEN)—CI-APRÈS NOMMÉE LA COMPAGNIE.

LES CLAUSES ET CONDITIONS SUIVANT LESQUELLES LES DEPECHES PAR TELEGRAPHE ET PAR CABLE SERONT TRANSMISES, SONT PRESCRITES PAR L'ORDONNANCE No 49274 DE LA COMMISSION DES TRANSPORTS DU CANADA EN DATE DU 5 DECEMBRE 1932 ET PUBLIÉE DANS LA GAZETTE OFFICIELLE DU CANADA AINSI QUE PAR L'ORDONNANCE No. 57471 EN DATE DU 22 MAI 1933.

Il est convenu entre la compagnie et l'expéditeur de la dépêche écrits au verso que la dite compagnie n'encourra aucune responsabilité du fait du montant reçu pour la transmission de la dite dépêche, à l'égard de tous dommages pouvant résulter du défaut de transmission ou de livraison, ou d'une erreur dans la transmission ou la livraison de toute dépêche non répétée, que ces dommages soient imputables à la négligence des employés de la dite compagnie ou autrement, ou à des retards causés par une interruption dans le fonctionnement de ses lignes, ou à toute erreur dans des dépêches chiffrées ou de sens obscur, ou à tout autre erreur due à une écriture illisible.

Pour éviter tout risque d'erreur, la compagnie répètera toute dépêche moyennant un versement supplémentaire de la moitié du tarif régulier et dans ce cas, la responsabilité de la compagnie vis-à-vis l'expéditeur sera limitée à $200. à l'égard de tous dommages dus à la négligence de la compagnie dans la transmission ou la livraison de la dépêche.

On peut s'assurer contre tout risque d'erreur dans la transmission et la livraison des dépêches, au moyen d'un contrat écrit stipulant le montant de l'assurance, et sur paiement (en sus du taux ordinaire pour les dépêches répétées) d'une prime calculée sur la base suivante: soit, 1% du montant assuré, pour toute distance n'excédant pas 1000 milles, et 2% pour toute distance plus grande.

La dite compagnie ne sera pas responsable du fait ou de l'omission d'une autre compagnie, mais s'efforcera de transmettre toute dépêche par toute compagnie de télégraphe dont il faudra se servir afin de faire parvenir la dépêche à destination, mais la compagnie n'agira en ce cas qu'en qualité d'agent de l'expéditeur et sans assumer de responsabilité. La compagnie n'assumera de responsabilité qu'à l'égard des dépêches présentées et acceptées à l'un de ses bureaux d'expédition; lorsqu'une dépêche est expédiée à un tel bureau par un messager de la compagnie, ce messager sera censé être l'agent de l'expéditeur; lorsqu'une dépêche est communiquée par téléphone, la personne qui la reçoit sera censée agir pour l'expéditeur et avoir l'autorité nécessaire pour consentir aux présentes en son nom. La compagnie ne répondra d'aucuns dommages, à moins qu'avis ne lui en soit donné par écrit dans les 60 jours qui suivront la remise de la dépêche pour transmission.

Aucun employé de la compagnie n'a le droit de changer les présentes conditions.

## CLASSES OF SERVICE

### FULL RATE TELEGRAM

A full-rate expediated service.

### DAY LETTER

A deferred day service at rates lower than the standard telegram rates as follows: One and one-half times the ten-word day message rate for the transmission of 50 words or less, and one-fifth of the initial rate for such 50 words for each additional 10 words or less.

Day Letters may be forwarded by the Company as a deferred service, and the transmission and delivery of such Day Letters are, in all respects, subordinate to the priority of transmission and delivery of full-rate messages.

Day Letters may be delivered by the Company by telephoning the same to the addressees, and such deliveries shall be a complete discharge of the obligation of the Company to deliver.

Day Letters are received subject to the express understanding and agreement that the Company does not undertake that a Day Letter shall be delivered on the day of its date absolutely and at all events, but that the Company's obligations in this respect is subject to the condition that there shall remain sufficient time for the transmission and delivery of such Day Letter on the day of its date during regular office hours, subject to the priority of the transmission of full-rate messages under the conditions named above.

### NIGHT MESSAGE

Accepted up to 2 A. M. at reduced rates, to be sent during the night and delivered on the morning of the next day after their date. At places where the Company's offices are not open on Sundays, delivery will be made on the morni of the next ensuing business day.

### NIGHT LETTER

Accepted up to 2 A. M. at reduced rates, to be sent during the night and delivered on the morning of the next day after their date. At places where the Company's offices are not open on Sundays, delivery will be made on the morning of the next ensuing business day. The rates for Night Letters are still lower than the standard Night Message rates, as follows: The standard day rate for 10 words for the transmission of 50 words or less and one-fifth of the initial rate for such 50 words for each additional 10 words or less. The minimum charge for transmission over the Company's lines of any Night Letter will be 30 cents.

Night Letters may, at the option of the Company, be mailed at destination to the addressees, and the Company shall be deemed to have discharged its obligation in such cases with respect to delivery by mailing such Night Letters at destination, postage prepaid.

# DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

TO: [redacted] Director, Indian Affairs Branch — OUR FILE:

FROM: Superintendent of Reserves and Trusts — YOUR FILE:

SUBJECT: — DATE: May 12, 1958.

s.23

We will be opening tenders on the sale of oil rights in Manitoulin Island on Thursday, 15th instant, at 3 p.m.

A point came up recently with respect to the application of the Ontario Agreement of 1924 to the sale of oil and gas rights in Ontario. Under the Agreement, Ontario is entitled to receive 50% of the revenue obtained from the disposal of mines and minerals. In the past this has not been interpreted to include oil and gas. [redacted] Mr. Christie says that he has his notes ready, but he considers the matter of sufficient importance to place it before the Deputy Attorney General, who is presently out of the city. He should be back in about a week.

It is suggested that, before the tenders are opened, we inform any representatives of the oil companies who may be present that this problem has arisen, and that it is felt that the matter must be determined by our legal advisers before sale is completed. This may take about ten days, and if it turns out that, in their opinion, Ontario would be entitled to 50% of the amount obtained from this sale, then it is felt that the sale will have to be cancelled for the time being until the matter has been straightened out with Ontario or the Indians.

W.C. Bethune.

I concur, but it might be advisable to open the envelopes & explain our views.

Ottawa, May 1, 1956.

Hon. Lester B. Pearson, P.C., M.P.,
House of Commons,
Ottawa, Ontario.

Re: Manitoulin Island Reserve No. 26
Oil and Gas

Dear Mr. Pearson:

Following a telephone request from your office, I am pleased to give you information regarding the oil and gas rights of the Indians of this Reserve.

In 1898, the Indian Band surrendered to the Crown their oil rights for disposal for their benefit. In 1909, rights in 60,000 acres were sold. Development did not obtain production, and these rights were recovered for the Indians in 1949, following which oil rights were again disposed of. Once again, the limited development work did not result in commercial production.

During the last few years, the oil rights have remained available for disposal to produce revenue for the Indian Band. Until recently there has been little or no interest in the oil and gas possibilities on the Island. During the last year, there has been some development and drilling on the main part of the Island; and this seems an opportune time to offer oil rights to obtain further money for the Indian Band.

A copy of the current advertisement for tenders is enclosed. This should bring some revenue to the Indians, the amount depending on the results of the sale.

Yours sincerely,

Original Signed by
H. M. JONES

19/20-6-9 (R.3)

Manitoulin Island Reserve No. 26

April 28, 1958.

In Indian Treaties and Surrenders, volume 1, on page 112, is No. 45, being a Declaration made 9th August, 1836 by Sir Francis Bond Head and Indians, relinquishing Islands to make them the property under the Crown, of all Indians allowed to reside on them.

In the same volume at page 235, is No. 94, being an Agreement made at Manitowaning, 6th October, 1862 with Ottawa, Chippewas and other Indians occupying the Island, (Manitoulin).

The report of the Executive Council Committee dated 14th November, 1862 is on page 237. This modifies the Agreement to exclude the eastern peninsula of the Island, and this area now comprises Manitoulin Island Reserve No. 26 in which we are asking for tenders for oil permits.

Copies of the ad. for permits and copies of the Indian Oil and Gas Regulations are enclosed.

By Surrender No. 401 dated 8th June, 1898, the Wikwemikong Band surrendered petroleum, oil and gas in the unceded portion of Manitoulin Island to Her Majesty the Queen in trust to dispose of the same. Letters Patent were granted in 1909 to oil and gas in parcels amounting to 60,000 acres. The grants were dated 14th April, 1909 to the Great Northern Oil Company Limited for 50,000 acres, and to Philomene Poirier for 10,000 acres. Philomene Poirier granted her parcel to Great Northern Oil Company Limited by deed of December 26th, 1917, registered April 22, 1918 in the Registry Office at Gore Bay.

Ontario Order in Council dated 17th November, 1949, recites the incorporation of the Company, and that its Letters Patent were cancelled 2nd December, 1948, and "accordingly, all its real and personal property undisposed of at the time of the cancellation of its Letters Patent have been forfeited to the Crown in the right of Ontario".

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

The Order in Council recommends that under the Escheats Act, 1942, (Ont.), upon payment to the Public Trustee of $3,000.00, "any right, title or interest which the Crown, in the right of the Province of Ontario has or may have in the lands hereinbefore particularly described, and any of the said Petroleum and Gas rights, be granted and released to the Crown in the right of the Dominion of Canada, in pursuance of its request so to do", subject to the terms and conditions of the said Deed of Surrender dated the 8th day of June, A.D., 1898, made on behalf of the Wikwemikong Band of Indians".

Gentlemen:

We have recently been advised by the Department of Citizenship and Immigration, that tenders on three parcels will be received on May 15th, covering leases for the drilling of oil and gas. We have also been advised that your office is in possession of plans showing the parcels A, B and C, which are included in these lease tenders.

This is to write and inquire whether you might be in a position to forward a set of these maps to us showing the acreage and location involved in the Manitoulin Island Reserve No. 26.

Very truly yours,

John L. Cannon

Re: Manitoulin Island Reserve #26

Dear Sir:

Your letter of April 14th was received. The Parcels A, B, and C being offered for tenders comprise this Indian Reserve, located in the peninsula at the east end of the Island.

Pitamillian Island is not recognized. If you wish to enquire again, can you supply a map showing the Island.

Yours truly,

J. J. Kelso

J. C. Bethune,
Superintendent,
Reserves & Trusts.

Re: Manitoulin Island Reserve No. 26

Dear Sir:

In reply to your letter of April 8th, we send to you herewith copies of the advertisement inviting tenders for Parcels A, B and C, comprising this Reserve. The tenders must be accompanied by an accepted cheque in Canadian funds.

I enclose also, a copy of the Indian Oil and Gas Regulations governing disposal of oil and gas in Indian Reserves.

Yours truly,

W. C. Bethune,
Superintendent,
Reserves & Trusts.

Dear Sir,

This is an enquiry about the status of lands in Manitoulin Island.

I understand, of course, that Indian reserves are not open for staking, but what is the position with regard to staking in the townships? Does staking there also apply in the case of gas and oil?

Will you please let me have all available information on the sale of leases, on May 15, to oil and gas rights in the Indian Reserve land, as mentioned in newspapers last week?

Yours truly,
Geo A. Checklin.

Oil and Gas Rights

Manitoulin Island Reserve No. 26

SEPARATE SEALED TENDERS will be received until 3 p.m. THURSDAY, the 15th day of May, 1958, for the right to take permits under the Indian Oil and Gas Regulations, on parcels of land in Ontario.

The permit term is two years.

The rental is 20¢ per acre for the first year, and 30¢ per acre for the second year. A fee of $20.00 is payable for each permit. The following permit areas are offered for tenders:

Parcel A:

That portion of Manitoulin Island Indian Reserve No. 26 lying northerly of the south boundary of Concession 3, Wikwemikong Township, approximately 17,500 acres.

First year's rent $3,500.00 and fee $20.00; total $3,520.00. No tenders

Parcel B:

That portion of Manitoulin Island Indian Reserve No. 26 bounded on the north by the south boundary of Concession 3 Wikwemikong Township, and on the south by a line between Concessions 3 and 4 in South Bay Township, and Concessions 14 and 15 in Kaboni Township, approximately 45,000 acres.

First Year's rent $9,000.00 and fee $20.00; total ~~$9,020.00.~~ 9,502.25 Imperial Oil
482.25 Bonus

Parcel C:

That portion of Manitoulin Island Reserve No. 26 lying southerly of the line between Concessions 3 and 4 in South Bay Township, and Concessions 14 and 15 in Kaboni Township, approximately 39,500 acres.

First year's rent $7,900.00 and fee $20.00; total $7,920.00. No tenders

A plan showing the parcels may be seen at Indian Affairs Branch office, 503 Kent-Albert Building, Ottawa.

Each tender must be accompanied by an accepted cheque to the Receiver General of Canada for the amount tendered, which must include the first year's rental, permit fee and any bonus offered. The second year's rental will accrue due at the commencement of the second year of the permit term.

Tenderers may bid on one or more parcels. Each tender must be in a separate sealed envelope marked "TENDER FOR MANITOULIN ISLAND RESERVE PARCEL A, (B) OR (C)".

Tenders must be sent to reach the undersigned not later than 3 p.m. THURSDAY, the 15th day of May, 1958.

Dated at Ottawa, this 18th day of March, 1958.

Manitoulin Island Reserve #26

Dear Sir:

We are today in receipt of a letter from Dr. A. B. Irwin, in Calgary, concerning the posting of the above Indian Reserve for public bidding. He has suggested that you might be able to supply us with further information as to the date such sale might be held. It would certainly be very greatly appreciated if you could give us any information relative to this.

In our letter to Dr. Irwin we pointed out that we were presently making plans for our 1958 operations and information as to whether this parcel of land would be posted in sufficient time to be included in our planning would be most helpful.

Yours very truly,

W. D. C. MACKENZIE,

Attention: Superintendent Reserves & Trusts.

Re: Manitoulin Island Reserve #26.

Reference is made to your memorandum of February 4.

It is my understanding that Imperial Oil had requested the advertisement of only that part of this reserve for which a description was prepared by Legal Surveys.

I suggest that the whole reserve might be advertised as a single permit. Imperial might be sufficiently interested to take up a permit of the whole reserve, thereby bringing in higher permit rentals.

As I have no information on the prospects for approval of the proposed oil and gas regulations, I am not sure how the advertisement should be worded, but I do suggest that an early sale of these oil and gas rights be made.

A. B. Irwin

FROM: Superintendent, Reserves and Trusts YOUR FILE:

SUBJECT: Manitoulin Island Indian Reserve No. 26, Ontario. DATE: February 4, 1958.

You will have received Imperial Oil's letter of January 30th. The portion of the reserve which they asked to have advertised is an area of approximately 45,000 acres as described in a description dated November 1, 1957, from Legal Surveys which is enclosed.

The Company has their holdings on the island and would like to have a permit of this area disposed of in time for them to plan their work.

It is suggested that an advertisement might be made at an early date.

Although the official form of our permits under the new regulations were not settled, we can issue a permit for this area; and the form used would be useful in settling our standard form.

Dear Sir:

We requested Mr. F. J. Kehoe, last Fall, to arrange for the posting for bid of Indian Reserve No. 26 in Manitoulin Island. He expected that it would be so posted in the latter part of the winter and we were speaking to him by telephone today enquiring as to when we could expect that the Reserve would be posted. He suggested that we write you.

At this season of the year, of course, we are scheduling our 1958 summer season work and as we will be doing other work in Manitoulin Island we would like to be able to take this particular Indian Reserve into our calculations so that if we should be successful in the acquisition of this Reserve, when it is posted, that eventuality will have been taken care of in our plans.

We would very much appreciate it if you could give us an indication of when this Reserve will be posted for public bidding and, needless to say, if it could be posted at an early date we would very greatly appreciate it.

Yours very truly,

It is proposed to offer the following portion of the reserve for an oil permit: lying between the south boundary of Con. 3 Nikwemikong and the north boundary of Con. 4 South Bay, which boundary line continues as the north boundary of Con. 15 Kaboni. This area is 8.75 miles north and south by the width of the peninsula, approximately 43,300 acres.

Will you please advise if your records show any impairment on our title which would limit the area available for an oil contract under the regulations.

W.C. Bethune,
Superintendent,
Reserves and Trusts.

Re: Manitoulin Island Reserve #26

Dear Sir:

Enclosed is a copy of a description submitted by an oil company which has asked us to put the area described up for tenders.

A plan was supplied and the area appears to be bounded on the north by the north boundary of Concession 2, Wikwemikong, and the production thereof to the shoreline, and on the south by the south boundary of Concession 14, Kaboni, and the production thereof to the shoreline, West and east boundaries are the shore-line

Would you please supply descriptions of the area. We would require short descriptions for use in an advertisement, and also for use in a permit.

As it is desired to publish the advertisement in the first part of November, may the descriptions be supplied by the end of October, please.

Yours truly,

W. C. Bethune,
Superintendent,
Reserves & Trusts.

Manitoulin Island Indian Reserve No. 26

Dear Sir:

We telephoned you recently with respect to the above described Indian Reserve and you advised that the rights had been surrendered to your Department so that you were in a position to post the same for bidding. You indicated that you would probably post all of the reservation but would be able to break it down in blocks so that any individual requirements could be taken care of.

We attach hereto two copies of a map on which is outlined in red the lands which we would request be posted for bidding, together with a rough description of lands contained within these red outlines.

We would appreciate receiving from you the customary notice when the lands have been posted for bid.

Yours very truly,

W. D. C. MACKENZIE,

Re: Petroleum
Saskatchewan Inland Reserve, No.

Dear Sir:

Your letter of October 9th was received. This Reserve comprises approximately 200,000 acres. Under the regulations, permit rental for the first year is twenty cents per acre. The Reserve could be divided into permit areas and offered for tenders at not less than the minimum rentals.

A copy of the Regulations is enclosed. Sections 4 to 14 deal with petroleum permits, and Section 15 following with petroleum leases.

If we have a firm commitment from a responsible party that they will tender at least the minimum rental, the Reserve could be advertised for tender.

Yours truly,

J. Kelso

Re: Petroleum - Manitoulin Island Reserve

Dear Sir:

Your letter of March 13th was received. Petroleum rights in an Indian Reserve are held for the benefit of the Indian Band. Regulations control the disposal of oil rights and we enclose a copy. Section 4 provides for advertising for tenders for a permit area, and Section 16 for tenders for a lease area.

On the Island, there are available Sucker Lake Reserve No. 25 of 599 acres; Sheguindah Reserve No. 24 of 5,106 acres; and Manitoulin Island Reserve of 102,070 acres. If you would undertake to tender at least twenty cents an acre for either of the two larger Reserves, they could be advertised for tenders. If Sucker Lake Reserve were to be disposed of, it should be by lease as it comprises only 599 acres. The minimum price on this would be $619.00 covering rental at $1.00 per acre and lease fee.

In addition to permit and lease rentals, development work is required as provided in the Regulations.

J.K.
for W. C. Bethune,
Superintendent,
Reserves & Trusts.

Re: Manitoulin Island Indian Reserve
Petroleum

Dear Sir:-

Your letter of the 25th of February was received. There is presently no contracts on this Indian Reserve.

If you would state that you would be prepared to bid, permit areas could be offered for tenders at not less than the minimum rate of 10¢ per acre. The offering could be made this summer.

Yours truly,

L.L.Brown,
Superintendent,
Reserves and Trusts.

Dear Sirs, RE: re. Oil + Gas Rights. Manitoulin Island

Could you advise me whether the Newyork people have relinquished their rights on the Indian Reservation, i.e. on the peninsula, and what parcels, if any, are taken there and what are not for oil and gas exploration or, if you can so advise, whether any are taken for other mineral exploration? I am surveying some freehold rights on the island ~~and~~ early in April and would like to take the peninsula into consideration at the same time.

Thanking you in advance.

Yours very truly.

MEMO. FOR FILE:

RE: MANITOULIN ISLAND UNCEDED - PETROLEUM

Mr. Paquette of Mr. Drew's office telephoned to enquire if there were now any oil leases on Manitoulin Island. I advised him that we were concerned only with the Indian Reserves. On them there were presently no oil contracts. Our Practice is to advertise, and if someone were interested, we could advertise for tenders for a permit on the unceded Reserve.

There have been a contract on a large part of the Reserve as well as some oil contracts on the main part of the Island.

The Local Master of Titles
and
Registrar of Deeds,
District of Manitoulin,
GORE BAY,
Ontario.

Attention:- Jessie A. Clarke

Dear Sir or Madam:-

In reply to your letter of September 22, 1950, please be advised that under separate cover a cheque for $3.16 issued in favour of the Registrar of Deeds for the District of Manitoulin should reach you in the course of the next few days.

Your bill dated March 14, 1950, unfortunately became buried on file and the matter was only brought to our attention when your above referred to letter was received.

Yours truly,

D.J. Allan,
Superintendent,
Reserves and Trusts Division.

Re: Manitoulin Island - Oil
Your file 19/20-6-9

Your letter of the 22nd of June was received. This Branch has not the drillers logs, oil records, etc. requested by Mr. Radack.

Dr. Lilley has advised that Mr. Radack would be on the Island during the drilling period. When in Ottawa, Dr. Lilley met Dr. Bell and Dr. Caley of the Geological Survey and received a copy of the geological report made some years ago. No doubt that report was supplied to Mr. Radack.

We have not a record of the different locations of the wells drilled in 1909 or previously. It is doubtful if logs were made of those old wells.

23193

Indian Affairs Branch,
Department of Citizenship and Immigration,
OTTAWA, Canada.

I enclose herewith a letter which was dictated by Mr. Stanley B. Radack, representative of the Company who has leased a block of land on Manitoulin Island Reserve for oil prospecting.

Mr. Radack is anxious to secure data on previous wells drilled, which I am unable to give him.

I can show him some of the locations, but to my knowledge there is no record of any of these wells in this office and probably not in this Department, however, Mr. Radack is most anxious to get the information as early as possible and I would be pleased to receive a reply at the earliest convenience advising where he might obtain same.

I might advise that the Company have begun drilling operations on June 21st. 1950.

C.R. Johnston,
Superintendent,
Manitoulin Island Indian Agency.

Mr. D.J. Allen,
Supt. Resources and Trusts,
Indian Affairs Branch,
Department of Citizenship and Immigration,
OTTAWA, Canada.

Dear Sir:

I would aporeciate your forwarding to me c/o Mr. C.R. Johnston, Manitowaning, Manitoulin Island, Ontario, any information that your office has and which is available on the drilling of wells for oil and gas on the Indian Reservation on Manitoulin Island. The information desired is drillers logs, well records, dates when wells were drilled, location of wells drilled etc.

I am representing the party which at the moment has a concession to drill for oil and gas on the reservation and any information which is available will be greatly appreciated.

Thanking you for your trouble, I remain,

Yours very truly,
Stanley B. Radack

20608

June 14, 1950

Mr. J. F. Caley,
Borings and Groundwater Section
Department of Mines and Resources
Geological Survey of Canada
Ottawa, Canada

Dear Mr. Caley:

A few minutes ago I talked with Mr. Keough, of the Indian Affairs Branch, on the telephone and advised him that we planned to start operations on the Indian Reservation in Manitoulin Island early next week. Possibly he has already talked with you and told you of our plans. I asked him to ask you for any suggestions that you might care to make as to saving samples and cores, and if it would be possible for you to send me an additional copy or two of the Manitowaning and Little Current topographic sheets, which you so kindly sent me on November 5, 1949.

Our program, which is necessarily subject to revision as information is accumulated, is to drill four diamond drill holes roughly on a line perpendicular to the strike to at least the first porosity in the Trenton. It is my intention to start the first well on about Wednesday or Thursday of next week at a point close to the shore of the northeast end of South Bay. The second well will be located on the east shore of Roberts Bay due east of Benson Point. The third well will be located on the east side of Thomas Bay as close to the mouth of the bay as we can get without incurring heavy costs for transporting equipment. The fourth well which we plan to drill will be located in the north portion of the reservation and in or close to the group of wells which were drilled south and southwest of Smith Bay some years ago. This location is placed at the end because I wish to have additional studies made of the results of the drilling in that area before setting this location.

One of our younger geologists, Mr. Stanley Radack, connected with our Tulsa office, will stay on Manitoulin Island throughout the entire drilling period—which we anticipate will cover two to three months. The drilling will be done by Jones & Bradley, of Noranda, Quebec, and it is hoped that we can carry BX holes down to the Trenton. It is not expected that holes of this diameter will be suitable for production, but they should yield good cores and will certainly give us adequate information on pressure if we encounter anything interesting. We first thought of doing the work with cable tools but found that the cost of transportation of the cable tool equipment, both to the reservation and from location to location on the reservation, would be prohibitive.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

It is our intention to core almost continuously and to save representative cores until we reach the point immediately above the Trenton. We then plan to save the entire core and to have the cores examined by a paleontologist or stratigraphist who is well acquainted with the Ordovician formations. In the event that showings of either oil or gas are encountered, we expect to have the cores analysed for porosity and permeability.

As I understand it the things that we are planning to do here will follow very much the line which is being followed by the Union Gas Company in its diamond drilling work in southern Ontario. As you may know, Jones & Bradley have done the bulk of that work.

Any suggestions that you may care to offer will be greatly appreciated.

Very truly yours,

ERL:jp

CC: Mr. Keough
Mr. S. B. Radack

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

20019-4 (R.3)

June 14, 1950.

MEMORANDUM FOR FILE

Dr. E.R.Lilley of New York telephoned that he had obtained a diamond drilling contractor earlier than expected and was moving on to the permit area Monday or Tuesday of next week.

The drilling will not be for production as they will be small core holes. The first hole is to be about two miles south of the original group of wells and is planned to go about 800 feet. The second hole would be about 1000 feet at Robins Bay; the third hole is intended to be 1300 feet at Thomas Bay. They will then return north close to the old wells for the fourth hole.

Dr. Lilley will keep the cores and will send some to the U.S. for analysis. He asked if we had any suggestion as to the operation and requested a new map, copy of which he had received from Dr. Caley.

June 15, 1950

Telephoned Dr. J.F.Caley and reported to him and advised that Dr. Lilley was writing him direct for the map which is not yet published. I could not tell him if Dr. Lilley intended to have a geologist watching production of cores and he might take that up with Lilley when replying to his request for a plan.

MANITOULIN ISLAND INDIAN RESERVE

PETROLEUM AND NATURAL GAS RIGHTS

SEPARATE SEALED tenders will be received until 3 P.M., Thursday, the 13th day of July, 1950, for permits under the Regulations respecting petroleum and natural gas on Indian Reserves and Indian Lands on the following parcels of land in Manitoulin Island Indian Reserve:—

*Parcel A*: The Northerly 4,900 acres of the Reserve.
Minimum Value—$495.00.

*Parcel B*: 9,380 acres, extending from Parcel A South to Smith Bay.
Minimum Value—$943.00.

*Parcel C*: 6,028 acres at Cape Smith.
Minimum Value—$608.00.

*Parcel D*: 4,790 acres along the East shore of the Reserve running North from South Bay to Phipps Point on Manitowaning Bay.
Minimum Value—$484.00.

*Parcel E*: 4,332 acres on the East shore of the Reserve running South from Parcel C to James Bay.
Minimum Value—$439.00.

A plan showing the Parcel areas and particular descriptions may be examined at the office of the undersigned or at the office of Mr. C. R. Johnston, Superintendent of the Indian Agency at Manitowaning, Ontario.

Tenderers may bid on one or more parcels. A separate tender should be made for each parcel in a sealed envelope marked "Tender for Manitoulin, Parcel A (or B or C, etc.)"

Each tender must be accompanied by an accepted cheque to the Receiver General for an amount not less than the minimum value stated for each parcel, which covers the rental and permit fee.

Tenders must be sent to reach the undersigned by 3 P.M. Thursday, the 13th of July, 1950.

D. M. MACKAY,
Director, Indian Affairs,

Department of Citizenship
and Immigration,
Ottawa, 13 May, 1950.

Re: Manitoulin Island Indian Reserve - Oil

Following the issue of permit No. 16 to Thomas W. Hayes, the remainder of the Reserve has been divided into five parcels. We have had two enquiries for oil rights and it has been decided to advertise the five parcels in newspapers in Gore Bay and Little Current. Enclosed is copy of the advertisement which is being sent to the papers. The advertisement states that a plan showing the parcel areas may be seen at your office and the plan which is a print of plan No. F3235 is enclosed.

Tenders may be by letter enclosing a marked cheque for the amount bid for the parcel. They will be opened here on July 13th.

MANITOULIN ISLAND INDIAN RESERVE

PETROLEUM AND NATURAL GAS RIGHTS

SEPARATE SEALED TENDERS will be received until 3 P.M. Thursday, the 13th day of July, 1950, for permits under the Regulations respecting petroleum and natural gas on Indian Reserves and Indian Lands on the following parcels of land in Manitoulin Island Indian Reserve:-

| | |
|---|---|
| PARCEL A: | The Northerly 4,900 acres of the Reserve.<br>Minimum Value - $495.00 |
| PARCEL B: | 9,380 acres, extending from Parcel A South to Smith Bay.<br>Minimum Value - $943.00 |
| PARCEL C: | 6,028 acres at Cape Smith.<br>Minimum Value - $608.00 |
| PARCEL D: | 4,790 acres along the East shore of the Reserve running North from South Bay to Phipps Point on Manitowaning Bay.<br>Minimum Value - $484.00 |
| PARCEL E: | 4,332 acres on the East shore of the Reserve running South from Parcel C to James Bay.<br>Minimum Value - $439.00 |

A plan showing the Parcel areas and particular descriptions may be examined at the office of the undersigned or at the office of Mr.C.R. Johnston, Superintendent of the Indian Agency at Manitowaning, Ontario.

Tenderers may bid on one or more parcels. A separate tender should be made for each parcel in a sealed envelope marked "Tender for Manitoulin, Parcel A (or B or C, etc.)"

Each tender must be accompanied by an accepted cheque to the Receiver General for an amount not less than the minimum value stated for each parcel, which covers the rental and permit fee.

Tenders must be sent to reach the undersigned by 3 P.M. Thursday, the 13th of July, 1950.

D.M. MacKay,
Director, Indian Affairs.

Department of Citizenship and Immigration,

Re: Manitoulin Island - Oil

Dear Sir:-

The Superintendent of the Indian Agency on Manitoulin Island is Mr.C.R. Johnston, whose office is at Manitowaning, Ontario, who will supply to you such information regarding the locations of the old wells as he may have available.

We have not here addresses of the local Indians and such information as is available regarding the wells could best be obtained upon enquiry on the ground.

Yours truly,

FK/CD

D.J.Allan,
Superintendent,
Reserves and Trusts.

Indian Affairs Branch
Ottawa, Canada

Dear Mr. Allan:

I expect to meet with a drilling contractor on Manitoulin Island within the next few days to go over our program for testing the Indian Reservation lands on which permit has just been issued to Mr. Thomas W. Hayes.

I would appreciate it if you would advise me as to the name and address of the local representative of your office on Manitoulin Island. It might also be helpful if you could give me the names and addresses of the chiefs or other individuals in the Indian group who might be able to assist us in gathering information about wells that have been drilled on the Reservation previously, and in setting the location for the contemplated tests.

Your assistance in this matter will be greatly appreciated.

Very truly yours,

Ernest R. Lilley

11368

MEMORANDUM TO THE DEPUTY MINISTER

MANITOULIN ISLAND UNCEDED RESERVE - OIL

This Reserve comprises 102,025 acres. Under a special authority of P.C. 1135, dated 7th March, 1950, permit No. 16 was issued to Thomas W. Hayes for 72,620 acres. The remainder of the Reserve, 29,430 acres has been laid out into five permit areas.

We have had enquiries from Mr.A.W. Macpherson of Little Current and Gas Corporation of Chicago regarding rights on the area not covered by the Hayes permit. It is not anticipated that there is any general demand for the areas and it is not expected that an offer will bring more than the base price of 10¢.

In view of the two enquiries received, it is recommended that the remainder of the Reserve be offered in permit areas and that the advertisement be published in the Gore Bay Recorder and the Manitoulin Expositor weekly newspapers at Gore Bay and Little Current at Manitoulin Island.

Director.

Dear Sirs,

Re: Manitoulin Island Land Sales

I have for acknowledgment your letter of March 10th requesting any information we may be able to supply as a result of our search of all the sale accounts covering lands on Manitoulin Island.

I regret to advise that to date we have not uncovered any information that would indicate that either the Standard Oil Company or Mr. Boiselle were at any time interested or directly connected with any of the purchases of lands on the Island.

We regret that this search has taken such a long time to complete and can assure you that we will do our utmost to expedite the same.

Yours truly,

D. J. Allan,
Superintendent,
Reserves and Trusts.

Re: Manitoulin Island Unceded Indian Reserve

Dear Sir:-

Your letter of the 24th of February was received. Progress is being made in our arrangements to permit prospecting in an area 72,620 acres comprising the southern part of the Indian Reserve.

These arrangements will be completed this month and we will then be able to advise you definitely as to the disposition of the remainder of the Reserve.

Yours truly,

D.J.Allan,
Superintendent,
Reserves and Trusts.

Dear Mr. Allan: Re: Manitoulin Island Unceded Indian Reserve

In further reply to your letter of February 4th last I have just now heard from Dr. Ernest R. Lilley and I quote particularly from his letter to me of February 20th last:-

"I do, however, wish to say that we will accept the Surveyor General's computation of 72,620 acres provided that will give us the right to select 36,310 acres. In other words, if the Permit is worded so that, even though the acreage does not actually prove to be 72,620 acres, we would still have the right to take 36,310 in leases that we desired, we are willing to accept the figure of 72,620. It will, of course, be in order to use the Surveyor General's description."

I have requisitioned for a cheque for $180.00, the balance of rental payable and I was speaking to Dr. Lilley by Long Distance yesterday and he told me that this cheque was coming forward and should reach me during the present week. Immediately it is received it will go forward to you.

Yours very truly,

JSM:bd

COPY

OC/2071/49

Copy of an Order-in-Council approved by His Honour the Lieutenant-Governor, dated the 17th day of November, A.D. 1949.

The Committee of Council have had under consideration the report of the Honourable the Attorney-General, dated November 15th, 1949, wherein he states that,-

1. The Great Northern Oil Company Limited was incorporated under the provisions of The Ontario Companies Act by Letters Patent dated the thirty-first day of January, A.D. 1906, and its Letters Patent were duly cancelled as of the Second day of December, A.D. 1948, for failure to file annual returns as required by The Companies Information Act, being Chapter 253 of the Revised Statutes of Ontario 1937, and accordingly all its real and personal property undisposed of at the time of the cancellation of its Letters Patent have been forfeited to the Crown in the right of the Province of Ontario, pursuant to Section 3 of Chapter 15, 11 George VI.

2. By a Deed of Surrender dated the Eighth day of June, A.D. 1898, made on behalf of the Wikwemikong Band of Indians, resident on the Reserve in the unceded portion of Manitoulin Island, the petroleum and gas rights in, under or upon the lands hereinafter mentioned were surrendered to the Crown in the right of the Dominion of Canada, subject to the condition that all monies received from the disposal thereof were, after deducting proper expenses of management, to be paid to the Wikwemikong Band of Indians.

3. The property undisposed of by the Company and forfeited to the Crown in the right of the Province of Ontario is as follows:-

This original has been removed for reproduction from the records of the Indian Land Registry
12-4-19 71

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

(a) The petroleum and gas rights on fifty thousand acres of land in Manitoulin Island, in the Province of Ontario, granted to the Company by a Patent from the Dominion Government dated the 14th of April, A.D. 1909, described as follows:-

"ALL AND SINGULAR those tracts of lands situate in the unceded portion of Manitoulin Island, in the Province of Ontario, and Dominion of Canada, described as follows:-

FIRSTLY: COMMENCING at a point due South 9,334 feet from the intersection of the water's edge of Manitowaning Bay with the line between the Fourth and Fifth Concessions of Sheguiandah produced Easterly across the said Bay, the said point being the Southwest corner of the tract of land granted to Philomene Poirier; Thence due east along the south boundary of the said tract 46,670 feet; Thence due south 9,334 feet; Thence due west 46,670 feet; Thence due North 9,334 feet to the point of commencement, containing an area of ten thousand acres, be the same more or less; excepting thereout and therefrom all land covered by the waters of Lake Huron that may fall within the said described limits.

SECONDLY: All that part of the southerly end of the unceded portion described as follows: COMMENCING at the water's edge of South Bay on the westerly side of the unceded portion at a point two miles due north of the line between the Fourteenth and Fifteenth Concessions of Tehkummah produced Easterly; Thence due east five miles more or less to the water's edge on the east side of the said unceded portion; Thence southerly, westerly and northerly following all the sinuosities of the shore of the said southerly end of the unceded portion to the point of commencement, containing an area of forty thousand acres, be the same more or less.

TOGETHER with the exclusive right and privilege of getting, extracting and taking such petroleum and gas and of entering upon and using and occupying so much of the said lands and to such an extent as may be reasonable necessary for that purpose, including the right of erecting upon the said lands and of removing from time to time any necessary buildings, machinery and works and residences and of laying and using pipes for the conveyance of such petroleum and gas over, through or under the said lands, also the right and privilege, but not exclusive, of laying and using pipes for the conveyance of such petroleum and gas over, through or under any other lands forming part of the said reserve to any port or ports on the reserve and the right and privilege of using any water, petroleum or gas which may or shall be found in, upon or under the said lands as is required in connection with the boring for or refining of the said petroleum or gas.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

SUBJECT to the Grantee paying to the Crown in the right of the Dominion of Canada a royalty of eight per cent, yearly on all petroleum produced upon the said lands except such as is required and used in connection with the boring for and refining of the said petroleum and gas.

(b) The petroleum and gas rights on ten thousand acres of land in Manitoulin Island, in the Province of Ontario, granted by a Patent from the Dominion Government dated the 14th of April, A.D. 1909, to Philomene Poirier, which rights were conveyed by Philomene Poirier to the Company by duly registered Deed of Conveyance dated the 22nd day of April, A.D. 1918, described as follows:-

ALL AND SINGULAR that tract of land situate in the unceded portion of Manitoulin Island, Lake Huron, in the Province of Ontario and Dominion of Canada, containing an area of ten thousand acres more or less and described as follows:-

COMMENCING at the intersection of the water's edge of Manitowaning Bay on the westerly side of the unceded portion with the line between the Fourth and Fifth Concessions of Sheguiandah produced easterly across the said Bay; Thence due east 46,670 feet; Thence 9,334 feet due south; Thence due west 46,670 feet; Thence due north 9,334 feet to the point of commencement excepting thereout and therefrom all land covered by the waters of Lake Huron that may fall within the said described limits together with the exclusive right and privilege of getting, extracting and taking such petroleum and gas and of entering upon and using and occupying so much of the said land and to such an extent as may be reasonably necessary for that purpose including the right of erecting upon the said lands and of removing from time to time any necessary buildings, machinery, works and residences and of laying and using pipes for the conveyance of such petroleum and gas over through or under the said lands, also the right and privilege but not exclusive of laying and using pipes for the conveyance of such petroleum and gas over, through or under any other lands forming part of the said reserve to any port or pôrts on the reserve and the right and privilege of using any water, petroleum or gas which may or shall be found in, upon or under the said lands as is required in connection with the boring for or refining of the said petroleum or gas.

SUBJECT to the Grantee paying to the Crown in the right of the Dominion of Canada a royalty of eight per cent. yearly on all petroleum produced upon the said lands except such as is required and used in connection with the boring for and refining the said petroleum and gas.

4. The Department of Mines and Resources, Indian Affairs Branch, have requested that these petroleum and gas rights, which

000145

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

have been forfeited to the Crown in the right of the Province of Ontario, be granted and released to the Crown in the right of Canada so that they may enter into a much more advantageous lease for the development of the petroleum and gas resources for the benefit of the Wikwemikong Band of Indians of Manitoulin Island who surrendered the said petroleum and gas rights as aforesaid.

5. The Government of Canada is agreeable to pay to the Government of the Province of Ontario the sum of $3,000.00 for the surrender to it of the interest of the Crown in the right of the Province of Ontario in the hereinbefore mentioned petroleum and gas rights.

The Honourable the Attorney-General therefore recommends that under the provisions of The Escheats Act 1942, being Chapter 14, 6 George VI, upon payment to the Public Trustee of the sum of $3,000.00 by the Department of Mines and Resources of the Government of Canada, any right, title or interest which the Crown, in the right of the Province of Ontario, has or may have in the lands hereinbefore particularly described and in and to the said petroleum and gas rights, be granted and released to the Crown in the right of the Dominion of Canada in pursuance of its request so to do, subject to the terms and conditions of the said Deed of Surrender, dated the Eighth day of June, A.D. 1898, made on behalf of the Wikwemikong Band of Indians resident on the Reserve in the unceded portion of Manitoulin Island.

The Committed of Council concur in the recommendation of the Honourable the Attorney-General and advise that the same be acted on.

Certified,

(signed) H.A. Stewart
Clerk, Executive Council

Copy of an Order-in-Council approved by His Honour the Lieutenant-Governor, dated the 17th day of November, A.D. 1949.

The Committee of Council have had under consideration the report of the Honourable the Attorney-General, dated November 15th, 1949, wherein he states that,-

1. The Great Northern Oil Company Limited was incorporated under the provisions of The Ontario Companies Act by Letters Patent dated the thirty-first day of January, A.D. 1906, and its Letters Patent were duly cancelled as of the Second day of December, A.D. 1948, for failure to file annual returns as required by The Companies Information Act, being Chapter 253 of the Revised Statutes of Ontario 1937, and accordingly all its real and personal property undisposed of at the time of the cancellation of its Letters Patent have been forfeited to the Crown in the right of the Province of Ontario, pursuant to Section 3 of Chapter 15, 11 George VI.

2. By a Deed of Surrender dated the Eighth day of June, A.D. 1898, made on behalf of the Wikwemikong Band of Indians, resident on the Reserve in the unceded portion of Manitoulin Island, the petroleum and gas rights in, under or upon the lands hereinafter mentioned were surrendered to the Crown in the right of the Dominion of Canada, subject to the condition that all monies received from the disposal thereof were, after deducting proper expenses of management, to be paid to the Wikwemikong Band of Indians.

3. The property undisposed of by the Company and forfeited to the Crown in the right of the Province of Ontario is as follows:-

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

(a) The petroleum and gas rights on fifty thousand acres of land in Manitoulin Island, in the Province of Ontario, granted to the Company by a Patent from the Dominion Government dated the 14th of April, A.D. 1909, described as follows:-

"ALL AND SINGULAR those tracts of lands situate in the unceded portion of Manitoulin Island, in the Province of Ontario, and Dominion of Canada, described as follows:-

FIRSTLY: COMMENCING at a point due South 9,334 feet from the intersection of the water's edge of Manitowaning Bay with the line between the Fourth and Fifth Concessions of Sheguiandah produced Easterly across the said Bay, the said point being the Southwest corner of the tract of land granted to Philomene Poirier; Thence due east along the south boundary of the said tract 46,670 feet; Thence due south 9,334 feet; Thence due west 46,670 feet; Thence due North 9,334 feet to the point of commencement, containing an area of ten thousand acres, be the same more or less; excepting thereout and therefrom all land covered by the waters of Lake Huron that may fall within the said described limits.

SECONDLY: All that part of the southerly end of the unceded portion described as follows: COMMENCING at the water's edge of South Bay on the westerly side of the unceded portion at a point two miles due north of the line between the Fourteenth and Fifteenth Concessions of Tehkummah produced Easterly; Thence due east five miles more or less to the water's edge on the east side of the said unceded portion; Thence southerly, westerly and northerly following all the sinuosities of the shore of the said southerly end of the unceded portion to the point of commencement, containing an area of forty thousand acres, be the same more or less.

TOGETHER with the exclusive right and privilege of getting, extracting and taking such petroleum and gas and of entering upon and using and occupying so much of the said lands and to such an extent as may be reasonable necessary for that purpose, including the right of erecting upon the said lands and of removing from time to time any necessary buildings, machinery and works and residences and of laying and using pipes for the conveyance of such petroleum and gas over, through or under the said lands, also the right and privilege, but not exclusive, of laying and using pipes for the conveyance of such petroleum and gas over, through or under any other lands forming part of the said reserve to any port or ports on the reserve and the right and privilege of using any water, petroleum or gas which may or shall be found in, upon or under the said lands as is required in connection with the boring for or refining of the said petroleum or gas.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

SUBJECT to the Grantee paying to the Crown in the right of the Dominion of Canada a royalty of eight per cent, yearly on all petroleum produced upon the said lands except such as is required and used in connection with the boring for and refining of the said petroleum and gas.

(b) The petroleum and gas rights on ten thousand acres of land in Manitoulin Island, in the Province of Ontario, granted by a Patent from the Dominion Government dated the 14th of April, A.D. 1909, to Philomene Poirier, which rights were conveyed by Philomene Poirier to the Company by duly registered Deed of Conveyance dated the 22nd day of April, A.D. 1918, described as follows:-

ALL AND SINGULAR that tract of land situate in the unceded portion of Manitoulin Island, Lake Huron, in the Province of Ontario and Dominion of Canada, containing an area of ten thousand acres more or less and described as follows:-

COMMENCING at the intersection of the water's edge of Manitowaning Bay on the westerly side of the unceded portion with the line between the Fourth and Fifth Concessions of Sheguiandah produced easterly across the said Bay; Thence due east 46,670 feet; Thence 9,334 feet due south; Thence due west 46,670 feet; Thence due north 9,334 feet to the point of commencement excepting thereout and therefrom all land covered by the waters of Lake Huron that may fall within the said described limits together with the exclusive right and privilege of getting, extracting and taking such petroleum and gas and of entering upon and using and occupying so much of the said land and to such an extent as may be reasonably necessary for that purpose including the right of erecting upon the said lands and of removing from time to time any necessary buildings, machinery, works and residences and of laying and using pipes for the conveyance of such petroleum and gas over through or under the said lands, also the right and privilege but not exclusive of laying and using pipes for the conveyance of such petroleum and gas over, through or under any other lands forming part of the said reserve to any port or ports on the reserve and the right and privilege of using any water, petroleum or gas which may or shall be found in, upon or under the said lands as is required in connection with the boring for or refining of the said petroleum or gas.

SUBJECT to the Grantee paying to the Crown in the right of the Dominion of Canada a royalty of eight per cent. yearly on all petroleum produced upon the said lands except such as is required and used in connection with the boring for and refining the said petroleum and gas.

4. The Department of Mines and Resources, Indian Affairs Branch, have requested that these petroleum and gas rights, which

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

have been forfeited to the Crown in the right of the Province of Ontario, be granted and released to the Crown in the right of Canada so that they may enter into a much more advantageous lease for the development of the petroleum and gas resources for the benefit of the Wikwemikong Band of Indians of Manitoulin Island who surrendered the said petroleum and gas rights as aforesaid.

5. The Government of Canada is agreeable to pay to the Government of the Province of Ontario the sum of $3,000.00 for the surrender to it of the interest of the Crown in the right of the Province of Ontario in the hereinbefore mentioned petroleum and gas rights.

The Honourable the Attorney-General therefore recommends that under the provisions of The Escheats Act 1942, being Chapter 14, 6 George VI, upon payment to the Public Trustee of the sum of $3,000.00 by the Department of Mines and Resources of the Government of Canada, any right, title or interest which the Crown, in the right of the Province of Ontario, has or may have in the lands hereinbefore particularly described and in and to the said petroleum and gas rights, be granted and released to the Crown in the right of the Dominion of Canada in pursuance of its request so to do, subject to the terms and conditions of the said Deed of Surrender, dated the Eighth day of June, A.D. 1898, made on behalf of the Wikwemikong Band of Indians resident on the Reserve in the unceded portion of Manitoulin Island.

The Committed of Council concur in the recommendation of the Honourable the Attorney-General and advise that the same be acted on.

Certified,

(signed) H.A. Stewart
Clerk, Executive Council

Messrs. Herridge, Tolmie, Gray & Coyne,
Barristers, etc.,
140 Wellington Street,
Ottawa, Ontario.

Attention Mr. R. G. Gray

Dear Sir,

In reply to your letter of January 10th, I am enclosing herewith a white print of tracing 752, being a plan of the whole of Manitoulin Island and on which are shown the areas covered in the Patents to Philomene Poirier and the Great Northern Oil Company Limited.

The photostats of the numerous documents which you requested have already been forwarded to you as have the certified true copies of the aforementioned patents. I am enclosing herewith our bill in the amount of $12.30 to cover the cost of the aforementioned materials. We have not as yet completed our search of the sale books relating to sales of Indian lands on Manitoulin Island. When this task has been completed, we will immediately advise you as to our findings.

Yours truly,

D. J. Allan,
Superintendent,
Reserves and Trusts.

Re: Manitoulin Island Unceded Indian Reserve

Dear Sir:-

Your letter of the 1st of February was received and we have sent to you a copy of our letter of the 3rd of February to Mr. J.F. McFarland, Chief, Mining Lands Branch.

We received also your letter of the 19th of January. It is noted that we gave the total acreage 72,620 acres, whereas Dr. Lilley computes it at 70,814 acres. It is, of course, not possible to get exact results with a planimeter. The difference of 1806 acres is not serious, the additional rental on that area being $180.00. However, if we use the area of 72,620 as given by the Surveyor General, your client will be able to select leaseholds up to a total of 36,310 acres which is half the total acreage as computed by the Surveyor General. While pointing out the difference, Dr. Lilley stated that the description was entirely satisfactory.

Please advise if the Surveyor General's description may be used in the permit.

Yours truly,

D.J.Allan,
Superintendent,
Reserves and Trusts.

Re. Manitoulin Island Reserve

Dear Sir:-

Your letter of the 27th of January was received. The only provision for oil and gas exploration on Indian Reserves is under our regulations. Under these regulations, permits may be taken for exploration for one year. The rental is 10¢ per acre. The Permittee is entitled during the life of his permit to apply for oil production leases on areas not exceeding half of the permit area.

Our negotiations covering the southern half of the Indian Reserve are not yet completed. There has been some delay owing to the division of title with the Province of Ontario. However, it is now being arranged and we expect that in a month it will be completed and we will know exactly what area we have left to deal with. There will be something over 30,000 acres left.

If there is any interest in the development of this northern portion, we could put it up for tenders for permit areas at not less than the minimum price of 10¢ per acre.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'informatio*

Would your Company be interested in permits on the northerly 30,000 acres of the easterly peninsula comprised in the Indian Reserve?

Yours truly,

D.J.Allan,
Superintendent,
Reserves and Trusts.

Re: Manitoulin Island Unceded
Indian Reserve -Your file 118.2G

Dear Sir:-

Your letter of the 31st of January was received. A permit for oil rights is being arranged through Mr. McLaughlin, who had also advised us that application was being made to the Province for rights in land under the water.

We are sending to you a print of sheet No. 1 and sheet No. 2 of Plan F3235, showing the areas to be covered in the oil permit. The permit will be under our oil regulations. We enclose for your information a copy of the regulations with a specimen permit form.

Dr. Ernest R. Lilley is the Geologist for Mr. McLaughlin's client in New York. They are prepared to spend money to develop gas and oil possibilities in the Reserve. The permit on the Reserve area is to be issued to Mr. Thomas W. Hayes of New York. The rights for which they have applied to you would appear to fit in with the rights being obtained from this Department. The area in the Reserve includes areas amounting to 60,000 acres formerly held by The Great Northern Oil Company Limited. This was an Ontario Corporation and its letters patent

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

were cancelled the 2nd of December, 1948. Order-in-Council provides for the transfer of the escheated rights to Crown Dominion.

On the 30th of January we sent to Mr. Armand Racine, Public Trustee, a cheque for $3,000.00 to take up these rights. On completion of our title, we intend to issue a permit to Mr. Hayes for the total area of 72,620 acres shown in Plan F3235A.

Apparently the interests represented by Mr. Hayes have sufficient backing to develop the area and the development should be beneficial to the Wikwemikong Indians for whom the Reserve is held. We are doing what we can to expedite completion of the granting of rights in the Reserve so that active development may be undertaken this spring.

Yours truly,

D.J.Allen,
Superintendent,
Reserves and Trusts.

Re: Great Northern Oil Company Limited C.C. 5

Dear Mr. Allan:

I thank you for forwarding me copy of your letter of January 30th, 1950 addressed to Mr. Racine, Public Trustee for the Province of of Ontario, in which you forwarded cheque for $3,000.00 as previously arranged. For some time I have been carrying on negotiations with the Department of Mines (Ontario) respecting the obtaining of a lease of certain lands under water contiguous to the lands which are being licensed by your Department to my clients. The description of these lands has been prepared and I am awaiting the forwarding to me of the draft lease but, in speaking to Mr. McFarlane of the Department of Mines (Ontario) yesterday he advised me he was writing you for confirmation of the fact that a license was being granted my clients by your Department. As time is running out and as my clients have to arrange for drilling rigs I would appreciate your giving prompt reply to Mr. McFarlane's letter and perhaps you could furnish me with a copy of that reply. Could you also advise me when it is likely that the desired Order-in-Council will be passed.

Yours very truly,

PARLIAMENT BUILDINGS
TORONTO 2, ONTARIO

January 31, 1950

7307

Dear Sir:

Mr. John S. McLaughlin, K.C., 372 Bay Street, Toronto, has applied on behalf of Ernest R. Lilley, 18 East 48th Street, New York, for an oil and gas lease on some 5662 acres of land under the waters of Lake Huron adjoining Indian Reserve No. 26 on Manitoulin Island.

It is represented that Lilley has obtained or is obtaining from your Department a lease of some 100,000 acres in Indian Reserve 26 for the purpose of carrying on exploratory work or search for petroleum. I enclose herewith plan showing the area on the bed of Lake Huron for which application has been made to this Department. If your Department has already issued a lease, we would appreciate a copy of the same or if you have approved the issue of such a lease we would like to have your written corroboration. In other words, this Department feels that it should not issue a lease to the adjoining land under water to anyone other than the owner or lessee of the adjoining land. If the lease has not yet issued, and you have no objection to do so, it would be of interest to this Department to know the terms and conditions under which the lease is to be granted. Furthermore, if possible, we would like a sketch or plan of the area to be included in the lease.

If your Department has made any inquiry as to the bona fides of Mr. Lilley or the interests he represents, we would also like to know the results of your investigation, which would, of course, be held in strict confidence.

Yours very truly,

J. F. McFarland

Re: Great Northern Oil Company Ltd. C.C.5

Dear Sir:-

We have now received from the Registrar of Deeds at Gore Bay a continuation of the Abstract showing no registrations regarding the rights formerly held by Great Northern Oil Company Limited.

We send you herewith cheque for $3,000.00 to take up the Order-in-Council of the 17th of November, 1949.

To protect against the possibility of any dealing with these rights, it is desired that the Order-in-Council be registered in the Registry Office at Gore Bay. It would be appreciated if you would either have the Order registered and supply us with a duplicate or else supply us with two copies of the Order attested in a form acceptable by the Registrar of Deeds so that registration might be completed.

Yours truly,

D.J.Allan,
Superintendent,

Dear Mr. Allan:

We are awaiting response to our letter of January 16th in reference to the Manitoulin Island Indian Reservation.

We believe that the Manitoulin project tests will conclusively prove the substantial benefit of Shrapp Processing through use of mobile units, and establish definitely the particular value in making possible, economically, exploration quickly on a much larger area than through the standard prospecting procedure, as well as, more complete comprehensive exploration.

Any cooperation it is possible for you to extend in allowing us an opportunity, at least for a brief time, to explore these areas at our cost and expense will be to the public interest of Canada, also to its reservation Indians, and with a minimum disturbance to the natural surface conditions, inhabitants and wild life.

Your prompt consideration and cooperation in these premises will be truly appreciated.

Very truly yours,

Frank G. Buffum
President

Re: Manitoulin Unceded Indian Reserve
Your File 20019-4 (R. 3)

Dear Mr. Allan:

Following receipt of your letter of January 7th last, in which you forwarded me description of the lands to be licensed to my clients, I would advise that I forwarded this description to Dr. Lilley at New York and I am today in receipt of a letter from him advising that the description is satisfactory. For your assistance, Dr. Lilley has forwarded me a copy of his letter, dated January 18th, 1950, for submission to you, particularly in respect of the difference in acreage as determined by him and the acreage as determined by the Surveyor General and showing a difference of 1806 acres. I would particularly refer you to the second last paragraph of this letter of Dr. Lilley's and I would ask you to see that the acreage is rechecked by the Surveyor General so that I may be advised wherein the difference lies.

I note that you contemplate the immediate forwarding to the Public Trustee of the sum of $3,000.00. I have had several calls in this matter and I am glad to hear that it has received your attention. Would you kindly let me hear from you in respect to the difference in acreage so that I may communicate with Dr. Lilley. I presume that when this point is satisfactorily cleared the license will issue in the near future.

Yours very truly,

JOHN S. MCLAUGHLIN.

ERNEST R. LILLEY
18 EAST 48TH STREET
NEW YORK 17, N. Y.
ELDORADO 5-6200

January 18, 1950

John S. McLaughlin, K.C.
372 Bay Street
Toronto 1, Canada

Dear Mr. McLaughlin:

We have checked the description of the acreage to be included within the permit to be obtained from the Indian Affairs Branch of the Department of Mines & Resources, referred to in your letter of January 9 and briefly described as covering certain tracts in the unceded portion of Manitoulin Island known as the Manitoulin Island Indian Reserve No. 26. The description is satisfactory to us.

We regret, however, to say that we have not been able to check the acreage as computed by the Surveyor. We feel reasonably certain that his computation was made with a planimeter, and while planimeter measurements are not absolutely exact, the size of the difference between our detailed planimeter measurement and the total as given by the Surveyor is sufficiently large to make us feel that this ought to be reconciled before the permit is issued.

The additional payment to the Indian Office which would be involved because of the difference in the amount of acreage would hardly warrant asking the Office to make a check of its figures at this time. However, the difference between our total and that of the Surveyor General's office would become a factor of some importance in the event that oil is found and we apply for leases on part of the permit area. It would seem best to mention this discrepancy now and ask if the Surveyor General will check our planimeter measurements against his and advise us wherein the differences lie.

When the application for permit was forwarded to you on November 26, 1949, Tract A-area 1 was stated as containing 40,000 acres more or less. This total was based on the total shown in the Great Northern Oil Company's concession. Detailed planimeter measurement of this tract just made shows it to contain 42,159 acres. Recheck of Tract A-area 2 as given in that application shows 9,486 acres instead of 9,628. Recheck of Tract B gives us 9,889 acres instead of 9,896. Recheck of Tract C shows 9,280 acres instead of 9,300.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

The total acreage according to our planimeter measurements, which now include planimeter measurement of Tract A-area 1 rather than the 40,000 acres as shown in the original Great Northern concession, is 70,814 acres as against 72,620 acres as given by the Surveyor General - a difference of 1,806 acres.

I wish you would advise Mr. Allan that the description is entirely satisfactory to us and that we are only mentioning this difference in measurement now so as to clear it up and avoid any possible misunderstanding or difficulty in the event that we are fortunate enough to make a discovery and apply for leases. I attach a copy of this letter in the event that you wish to send it on to Mr. Allan.

We are returning copy of the Plan and description as requested by you. On the Plan we have outlined the location of the several tracts referred to above.

Sincerely yours,

Ernest R. Lilley

Mr. D. J. Allan, Superintendent,
Reserves and Trusts,
Department of Mines and Resources,
Indian Affairs Branch,
Ottawa.

Dear Mr. Allan:-

Thank you most kindly for your letter of the 3rd inst; and we are awaiting for information concerning what portion of the Manatoulin Island Indian Reservation has been allocated to the other parties interested for prospecting rights and what portion remains open for prospecting permit that we may submit formal application for same with correct remittance.

As previously advised you we have approximately one hundred thousand acres under contract for exploration, development and production on Manatoulin proper, where we expect to commence operations within a few days utilizing our new horizontal radial prospecting penetration process which we believe will more completely prospect and explore a given area quicker and with less expense than any other method. Since penetration is on a horizontal plane rather than drilling additional wells and continuing until striking a concentration which we do not believe exists on Manatoulin Island and that the production must be developed most economically from opening back present wells we are of course most interested in the series of wells covered by No. 1, to 13 inclusive as shown on Map 351A Manitoulin Island and the adjacent territory surrounding them if not already optioned.

We are also interested in the small Indian Reservation on Gore Bay where a production exploration project is immediately contemplated through the old wells near the town of Gore Bay and any of the other smaller Reservations on the main island which are not already under prospecting option. And which we are willing to option upon the basis required by the government.

R9

In relation to the Piapot and Haylands Indian Reserve the geology does not indicate that we are merited in making any investment for an option for exploration; however since our prospecting cost with the horizontal penetration process is relatively inexpensive for maximum area exploration we are willing to run a test on each of these reservations radially and probably do a better job of exploration than drilling of hundreds of vertical wells; on a checker board option on the part of the government, and with a 1/8 Royalty Premium on that portion retained by us, subject to usual lease. In the interests of quick development complete tests can be concluded by September 1st, and if oil is found the exploration holes will place it simultaneously on production. The lease will of course be handled through the Canadian land trust development project of which Manatoulin Island is a part.

Trusting to have the pleasure of hearing from you promptly and favorably, we remain, Very truly yours,

President.

Dear Sirs,

This will confirm our verbal request placed with Mr. Ogden that you prepare for us at our expense, in duplicate:

(1) White print of Manitoulin Island - tracing No. 752;

(2) Photostat copy of prospectus of the Manitowaning Oil Company, dated July 4, 1928;

(3) Photostat copy of prospectus of Great Northern Oil and Gas Company (found in your file in correspondence dated March 25, 1905);

(4) Photostat copy of Senate Debates of May 31, 1904.

Would you also be good enough to make a search of your Sales Books relating to Manitoulin Island and let us know if there is shown any sale or assignment of an interest in land on Manitoulin Island to either Standard Oil Company, Standard Oil Company of New York, or to a person by the name of Boselle.

Yours very truly,

Re: Manitoulin Island Unceded
Indian Reserve

Dear Sir:-

Your letters of December 5th and 21st were received.

We have received from the Registrar the continued abstract showing no further registrations to 5th December, 1949.

We referred the application to the Surveyor General's office for preparation of a description for use in the permit. We send you herewith description received from that office together with the two sheets of Plan F3235A referred to therein. Please note that the Surveyor computes the area of the tracts at 72,620 acres. Please advise if this description and area are acceptable.

If you are satisfied that the description adequately covers the land for which you have applied for an oil prospecting permit, we are now prepared to send to the Public Trustee $3,000.00 to take up the executive order transferring the oil rights to Canada.

Yours truly,

D.J.Allan,
Superintendent,
Reserves and Trusts.

## Description

The whole of those tracts of land in the unceded portion of Manitoulin Island known as Manitoulin Island Indian Reserve number twenty-six, in Lake Huron, in the district of Manitoulin, in the province of Ontario, which said tracts may be more particularly described as follows:

Firstly: The whole of the southerly part of the unceded portion of said Manitoulin Island adjoining and lying south of the north boundary of concession eight in the township of Kaboni in said province of Ontario and as said southerly part is shown on sheet two of the plan of the Southerly Part of said Indian Reserve, compiled from surveys by J.C. Baker, Ontario Land Surveyor in nineteen hundred and forty-five and nineteen hundred and forty-six and filed under number F. three thousand two hundred and thirty-five A in the Indian Affairs survey records, Department of Mines and Resources, Ottawa; excepting thereout and therefrom those portions of lots one to five inclusive in concessions eight and nine as said lots and concessions of said Township of Kaboni are shown on aforesaid plan number F. three thousand two hundred and thirty-five A.

Secondly: All that tract of land in the northerly part of the unceded portion of said Island as said northerly part is shown on sheet one of the plan of the Northerly Part of said Indian Reserve, compiled from surveys by J.C. Baker, Ontario Land Surveyor in nineteen hundred and forty-five, nineteen hundred and forty-six and nineteen hundred and forty-seven, filed under number F. three thousand two hundred and thirty-five in said Indian Affairs survey records, which said tract may be more particularly described as follows:

000177

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

Commencing at the southeast corner of lot five, concession seven in said township of Kaboni; thence north following the east boundary of lot five in concessions seven to one inclusive in said township of Kaboni; thence continuing north following the east boundary of projected lot five in concessions one to three inclusive in the township of Wikwemikong to the north boundary of said concession three in last mentioned township; thence east following the projected north boundary of said concession three in last mentioned township to the bank of Smith Bay; thence southerly and easterly following the said bank of Smith Bay to the east boundary of lot twenty-five in concession three of last mentioned township; thence south following the east boundary of lot twenty-five in concessions three, two and one in last mentioned township to the southeast corner of lot twenty-five in concession one of last mentioned township of Wikwemikong; thence continuing south following the east boundary of lot twenty-five in concessions one to six inclusive in said township of Kaboni; thence south following the projected east boundary of lot twenty-five in concession seven in said township of Kaboni to the bank of James Bay; thence in a southwesterly direction following said bank of James Bay to its intersection with the south boundary of aforesaid concession seven in said township of Kaboni; thence west following the south boundary of said concession seven to the point of commencement.

The tracts herein described under firstly and secondly containing 72,620 acres, more or less.

Reference- CSD 17

Your letter of December 20th to the Director, Indian Affairs Branch has been referred to this office. A payment of $6887.40 was received on December 1st from John S. McLaughlin, 372 Bay St., Toronto, on account of Thos. W. Hayes which is apparently to what you refer.

This represents a payment for one year permit to prospect for oil on land in the Manitoulin Island Unceded Reserve. The amount is arrived at on a per acerage basis of 10 cents.

Our records indicate the remittance was drawn on the Canadian Bank of Commerce.

W. Lauchlan,
Chief Treasury Officer.

Dear Sir,

We had some correspondence in the latter part of 1947 on the subject of payments for exports of cattle.

I do not know whether this relates to the same matter but we recently received advice of a payment of $6,887.40 Canadian deposited with the Bank of Canada for account of the Indian Affairs Branch, on approximately December 2, 1949. These Canadian dollars were remitted through the New York Trust Company and if you are able to identify this transaction I should appreciate very much if you could let me know the purpose of this remittance.

Yours truly,

William Hogan

FILE 20019-4 (R3)

OTTAWA, 9 December, 1949

MEMORANDUM TO FILE:

Mr. Gray phoned. He says he has made a complete search of Manitoulin Islands in Gore Bay Registry Office without finding any oil interests in Standard or Sonony.

He says Sun Oil are also conducting an enquiry as to possible oil rights held by that Company in Manitoulin.

He was unable to trace any definite or even approximate location of the area of the rights for which he was searching. He has covered available records and he is at the end of the trail without result. If there is any unrecorded grant, he has no means of locating it.

F. Kehoe,
Reserves and Trusts.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

Surface Lease No. 38-1

This indenture made this 1st day of June 1953.

BETWEEN

Her Majesty Queen Elizabeth II, represented by the Minister of Citizenship and Immigration, hereinafter called the Minister.

of the first part

AND:

Imperial Oil Limited, Box 485, London, Ontario, hereinafter called the Lessee.

of the second part

WHEREAS the lands herein described are Reserve lands within the meaning of The Indian Act, Statutes of Canada, 1951, Chapter 29.

AND WHEREAS the lessee is the holder of Petroleum and Natural Gas rights in the said lands under Petroleum ~~Location Lease~~ Permit No. 38

AND WHEREAS the lessee has applied under the Regulations respecting Petroleum and Natural Gas on Indian Reserves and Indian Lands for a lease of surface rights.

NOW THEREFORE THIS INDENTURE WITNESSETH that is consideration of the rents, covenants and agreements herein reserved and contained, the Minister doth demise and lease unto the Lessee for the purpose of drilling wells, constructing, maintaining, repairing pipes or pipe lines, roads, fences and structures necessary and convenient for the working of the location:

All that parcel of land shown in ~~red~~ Yellow on the plan incorporated herein and marked: "Portion of Kaboni Township Imperial Kaboni #1" and comprising 3 acres.

19-2039

Document disclosed under the Access to Information Act -
Document divulgué en vertu de la Loi sur l'accès à l'information

TO HAVE AND TO HOLD the said demised premises for and during the term from the date hereof to the 31st day of May, 1960 or beyond that date to the terminal date of any renewal of the said Petroleum ~~Location Lease~~ Permit or of any Petroleum Lease issued thereunder and including the well site.

Yielding and paying therefor unto the Minister, on the execution of these presents, the sum of

One hundred and ten dollars ($110.00)

the said payment being compensation in full for damages and destruction to the said lands, severance, inconvenience and disturbance; and rental to the 31st day of May, 1959.

And further yielding and paying thereafter the clear yearly rental of

One hundred and ten dollars ($110.00)

such yearly rental to be paid annually in advance on the 1st day of June in each and every year during the continuance of these presents.

The term of this lease shall not extend beyond the term of Petroleum ~~Location Lease~~ Permit No. 38 or any lease granted in substitution therefor, and if the said Petroleum ~~Location~~ Permit or Location Lease is terminated for any reason whatsoever, in its entirety, or with respect to the land herein described, then in such event this lease shall become absolutely null and void.

The lessee shall have the right at any time on written notice to the Minister to cease the use and occupation of the demised premises or any part thereof and thereupon this lease shall become absolutely null and void, insofar as it applies to the portion abandoned.

In the event of the termination of this lease as aforesaid, these presents and everything herein contained and the estate or term hereby created shall absolutely cease, determine and be null and void without any re-entry or any other act, and without any suit or other legal proceedings being brought or taken, provided further that Her Majesty shall nevertheless be entitled to recover from the lessee the rent then accrued or accruing, and provided further than any right of action by

Document disclosed under the Access to Information Act -
Document divulgué en vertu de la Loi sur l'accès à l'informat

Her Majesty against the lessee in respect of any antecedent breach of any of the covenants, provisions, stipulations or conditions shall not be prejudiced thereby.

The Minister hereby covenants and agrees with the Lessee that the said lessee, well and truly paying the rent hereby reserved and observing and performing the covenants herein contained, shall quietly and peacefully hold and enjoy the said land and premises without disturbance.

The lessee hereby covenants and agrees -

1. To pay the rentals hereby reserved.

2. To pay all taxes, rates and assessments that may be properly assessed or levied against it as the occupier of the said lands.

3. To compensate Her Majesty or any persons claiming through or under Her for damage done to any timber, cultivated land, growing crops, fences or buildings upon the said lands or the Indian Reserve of which they form a part.

4. To bury to a depth of eighteen inches, pipe lines land within the said lands or within the location; and to supply to the Director of Indian Affairs a plan showing the location of all pipe lines.

5. When required by the Director of Indian Affairs, to fence the demised premises with a stock proof fence and live stock guards, or regulation gate.

6. Upon the abandonment of any well or wells, to cause them to be plugged and all excavations in connection therewith to be filled in; and on the termination of this lease to restore the lands to the same condition, so far as it may be practical so to do, as that existing immediately prior to the entry thereon.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

It is hereby declared and agreed that this lease is collateral and subject to the provisions of the Petroleum Location Lease herein referred to.

IN WITNESS WHEREOF the Director of Indian Affairs, Department of Citizenship and Immigration, has hereunto set his hand, and the lessee has caused to be affixed its corporate seal, attested by the signature of its proper officers in that behalf, as of the day and year first above written.

DEPARTMENT OF CITIZENSHIP AND IMMIGRATION

488/20-69-26-38

TO: Director

OUR FILE: 19/20-6-9-38 (R.3)

FROM: Chief, Reserves and Trusts

YOUR FILE:

SUBJECT: Manitoulin Island Reserve No. 26
Imperial Oil Limited

DATE: April 15, 1959.

M13416

Imperial Oil Limited paid $9,502.25 and was granted Permit No. 38 on June 1st, 1958. The payment covered rental for the first year of the permit term of two years. The permit provides that in the event the Company fails to relinquish its rights by 31st May, 1959, an additional payment of $13,500.00 would accrue due.

Surface Leases No. 38-1, 38-2 and 38-3 were granted for well sites. The surface leases provide that the lessee has the right to abandon the lease areas, and thereupon the leases shall be null and void.

By letter of April 13, 1959, the Company advised of its intention to relinquish the permit and to surrender the three surface leases.

It is recommended that termination of the permit and surface leases be accepted.

W. C. Bethune,

Approved

Director.

Permit No. 16

DEPARTMENT OF
CITIZENSHIP AND IMMIGRATION

PETROLEUM AND NATURAL GAS PERMIT

THIS INDENTURE made in triplicate this 20th day of March in the year of Our Lord, one thousand nine hundred and fifty

BETWEEN His Majesty King George VI, represented herein by the Minister of Citizenship and Immigration, hereinafter called the "Minister"

of the First Part;

AND THOMAS W. HAYES of 10 East 48th St. New York, N.Y.

hereinafter called the "Permittee"

of the Second Part.

WHEREAS by Order of the Governor in Council bearing date the 5th day of October, 1948, regulations were made for the disposal by permit and lease of petroleum and natural gas rights on Indian Reserves in the Dominion of Canada, and Order in Council dated 7th March, 1950, authorized the granting of this Permit covering 78,620 acres

AND WHEREAS the Permittee having applied for a permit to prospect for petroleum and natural gas in the lands hereinafter described, and in consideration of the payment of the prescribed fee, the Minister has granted such permit upon the terms and conditions prescribed in the said regulations.

NOW THIS INDENTURE WITNESSETH that in consideration of and subject to the provisos, conditions, restrictions and stipulations expressed and contained in the said regulations, His Majesty doth hereby grant full right unto the permittee to enter upon the following lands to examine, search, survey and prospect for underlying geological structures capable of containing petroleum and/or natural gas therein namely:-

Document disclosed under the Access to Information Act -
Document divulgué en vertu de la Loi sur l'accès à l'information

ALL AND SINGULAR that certain parcel or tract of land described as follows:

DESCRIPTION

The whole of those tracts of land in the unceded portion of Manitoulin Island known as Manitoulin Island Indian Reserve number twenty-six, in Lake Huron, in the district of Manitoulin, in the province of Ontario, which said tracts may be more particularly described as follows:

Firstly: The whole of the southerly part of the unceded portion of said Manitoulin Island adjoining and lying south of the north boundary of concession eight in the township of Kaboni in said province of Ontario and as said southerly part is shown on sheet two of the plan of the Southerly Part of said Indian Reserve, compiled from surveys by J.C. Baker, Ontario Land Surveyor in nineteen hundred and forty-five and nineteen hundred and forty-six and filed under number F. three thousand two hundred and thirty-five A in the Indian Affairs survey records at Ottawa; excepting thereout and therefrom those portions of lots one to five inclusive in concessions eight and nine as said lots and concessions of said Township of Kaboni are shown on aforesaid plan number F. three thousand two hundred and thirty-five A.

Secondly: All that tract of land in the northerly part of the unceded portion of said Island as said northerly part is shown on sheet one of the plan of the Northerly Part of said Indian Reserve, compiled from surveys by J.C. Baker, Ontario Land Surveyor in nineteen hundred and forty-five, nineteen hundred and forty-six and nineteen hundred and forty-seven, filed under number F. three thousand two hundred and thirty-five in said Indian Affairs survey records, which said tract may be more particularly described as follows:

Commencing at the southeast corner of lot five, concession seven in said township of Kaboni; thence north following the east boundary

Document disclosed under the Access to Information Act
Document divulgué en vertu de la Loi sur l'accès à l'information

of lot five in concessions seven to one inclusive in said township of Kaboni; thence continuing north following the east boundary of projected lot five in concessions one to three inclusive in the township of Wikwemikong to the north boundary of said concession three in last mentioned township; thence east following the projected north boundary of said concession three in last mentioned township to the bank of Smith Bay; thence southerly and easterly following the said bank of Smith Bay to the east boundary of lot twenty-five in concession three of last mentioned township; thence south following the east boundary of lot twenty-five in concessions three, two and one in last mentioned township to the southeast corner of lot twenty-five in concession one of last mentioned township of Wikwemikong; thence continuing south following the east boundary of lot twenty-five in concessions one to six inclusive in said township of Kaboni; thence south following the projected east boundary of lot twenty-five in concession seven in said township of Kaboni to the bank of James Bay; thence in a south-westerly direction following said bank of James Bay to its intersection with the south boundary of aforesaid concession seven in said township of Kaboni; thence west following the south boundary of said concession seven to the point of commencement.

The tracts herein described under firstly and secondly containing 72,680 acres, more or less.

JK

together with full right and liberty of placing and maintaining thereon such prospecting equipment as may be deemed necessary for the said purpose.

TO HAVE AND TO HOLD the same unto the permittee for the term of one year from the date hereof.

PROVIDED ALWAYS and this permit is granted upon and subject to the following provisos, conditions, restrictions and stipulations, that is to say, -

Document disclosed under the Access to Information Act -
Document divulgué en vertu de la Loi sur l'accès à l'information

1. THAT the permittee shall and will well and truly and faithfully observe, perform and abide by all the obligations, conditions, provisos and restrictions in or under the said regulations imposed upon permittees.

2. THAT the said lands shall be used for the said purpose and for no other purposes.

3. THAT the permittee shall and will during the said term or sooner determination thereof carry on his prospecting or surveying operations in such a way as not to cause any inconvenience, nuisance or obstruction to any railway right of way, roadway, pass, passage, river, creek or place or to any private, public or Crown lands or conflict with or embarrass or in any manner whatsoever occasion any private or public damage, nuisance or inconvenience.

4. THAT the permittee shall at the expiration or sooner determination of the term of this permit quietly and peacefully vacate and surrender the hereinbefore described lands together with his permit and all interest therein.

5. In case of default by the permittee in the due observance or compliance with any of the terms or conditions of this permit or the regulations governing the issue thereof the Minister may in his discretion cancel this permit or any portion thereof and the same shall be declared null and void as the Minister may decide.

IN WITNESS WHEREOF the Deputy Minister of the Department of Citizenship and Immigration, on behalf of the Minister, and the permittee have hereunto set their hands the day and year first above written.

# ORDOVICIAN & SILURIAN STRATIGRAPHY OF MANITOULIN ISLAND, ONTARIO

by

B. A. Liberty

## ABSTRACT

Middle Ordovician to Middle Silurian strata inclusive are well exposed in the Manitoulin Island area. They are typically carbonate with limestone dominance in the Silurian. These strata correlate readily with Northern Michigan, Central Ontario and New York State. As these lithostratigraphic units are traceable both westward and southward, the lithologic nomenclature is considered applicable throughout Southern Ontario.

## INTRODUCTION

These descriptive notes follow the lithologic nomenclature previously used by T. E. Bolton and the writer (Bolton 1957, Liberty 1963, 1964, 1966) for the most part. This lithologic succession has been mapped comprehensively across Southern Ontario from New York State to the Northern Peninsula of Michigan. The terminology used (Fig. 7) is independent of, and complementary to, previously recognized biostratigraphic units. It is not dependent on faunal zonation and is not restricted by time connotations.

Two new stratigraphic names are proposed. In the Middle Silurian, the "Mindemoya formation" is proposed in order to clarify the St. Edmund problem. Also in the Ordovician, the member name "Thornbury" is proposed for the upper member of the Whitby formation. It is hoped that apathy to new ideas and token resistance to new names will not impede the need for stratigraphic clarity.

The writer is indebted to the Geological Survey of Canada, under whose auspices the Manitoulin Island project was carried out, between 1954 and 1957.

## BASAL BEDS

The Basal Beds consist of maroon to red and green mottled shales and sandstones. A remnant only can now be seen south of the Roosevelt Memorial on Highway 68 at the Birch Island turn-off. Formerly, an 8-foot section could be seen at this locality. Northward from the monument and westward at Birch Island station a basal "sharpstone conglomerate" of quartzite can be seen in the unit. The Basal Beds have a maximum thickness of about 80 feet, but are absent over Precambrian topographic highs.

Fossils have only been found in uppermost strata. The unit is correlated with the Shadow Lake formation of Central Ontario, and uppermost strata are considered to be of Middle Ordovician age.

## SIMCOE GROUP

The term Simcoe Group (Liberty, 1955, 1963) embraces the following four carbonate formations: Gull River, Bobcaygeon, Verulam and Lindsay. Defined to embrace carbonates between the underlying and overlying clastics in Ontario, the

Document divulgué en vertu de la *Loi sur l'accès à l'information*

Simcoe Group would include in the Ottawa area, the underlying St. Martin and the overlying Eastview formations. Thus, the need for the term Ottawa group, mega-group or suppergroup is negated in the Ottawa type area.

The Simcoe Group embraces strata of Blackriveran, Trentonian, and Edenian age in Ontario. The Blackriveran-Trentonian boundary is considered to lie within the Bobcaygeon formation, (Foerste's Cloche Island beds). In Central Ontario, the Trentonian-Edenian time boundary is considered to lie within the Lindsay formation, between the Hallowell and the Hillier units of the Cobourg. On Manitoulin Island, one Edenian fossil has been found in the Lindsay formation and thus youngest Simcoe Group strata only are considered to be of Edenian age.

On the Island, the group is about 385 feet thick at its greatest development. It thickens to about 900 feet in Essex County at the west end of Lake Erie and in Prince Edward County at the eastern end of Lake Ontario. The Simcoe Group is about 750 feet thick in the Ottawa Valley.

## GULL RIVER FORMATION

This term applies to the strata between Foerste's "Basal Beds" (Foerste 1912) and Cloche Island beds - his Swift Current beds. This term has been preoccupied by use in Western Canada. Uppermost strata usually consists of dove-weathering, grey, lithographic and sublithographic limestone. At a few localities, these strata have been dolomitized and appear as brown, finely crystalline dolostone. Lower strata are thin to medium beds of grey to dark grey, finely crystalline and finely granular limestone and argillaceous limestone. There is the occasional 0.4 to 0.5 foot bed of brown finely crystalline dolostone. The formation thickens from about 80 feet in the outcrop belt to 235 feet at the southern end of the Island. Fossils include Tetradium, Columnaria, Ostracods and Bryozoa, but these are sparse in numbers.

The formational contact with the overlying Bobcaygeon can be seen at Stop 4. The lithology seen represents typical "Lowville sedimentation" from New York State to the Northern Peninsula of Michigan. Strata like this can be seen below water level at Bony Falls (G.M. Ehlers, Personal communication), i.e., below the rock normally seen at that locality, the Bony Falls formation. Overlying this lithology in northern New York and southeastern Ontario is the Chaumont unit which is Blackriveran in age, as it contains a Black River fauna. Subsurface workers, however, consistently use this "Lowville lithology" in the top of the Gull River Formation as the top of the Black River - a practice which is inconsistent with faunal evidence, and regional stratigraphy.

## BOBCAYGEON FORMATION

The term Bobcaygeon is applied to Foerste's Cloche Island beds (Foerste 1912) above his Swift Current and below the "Unnamed beds" (Liberty 1954). The formation consists of brown, sublithographic and very finely crystalline limestone, finely crystalline dolostone in digitate and bedded form, and minor amounts of finely granular and finely bioclastic limestone. Bedding is irregular and varies from 0.1 to 1.5 feet in thickness. Thickness of the unit varies from 80 feet in the outcrop to 135 feet in the subsurface.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

CORRELATION OF ORDOVICIAN FORMATIONS

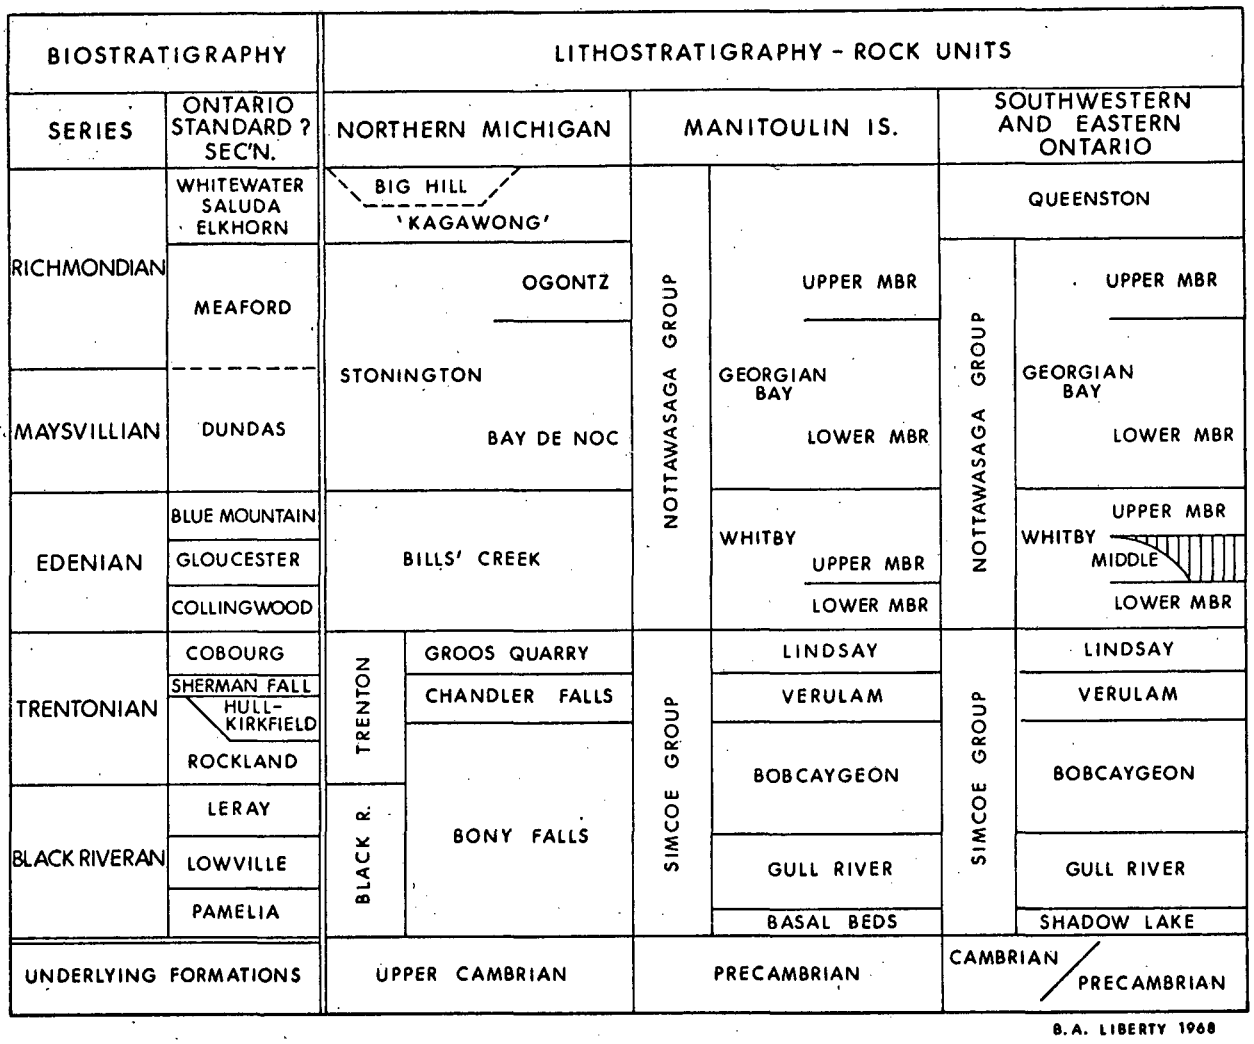

Figure 8

The formation is generally considered fairly fossiliferous on the weathered sections. At the time of the construction of this new Highway 68, which we are visiting, the rock was very fresh and few fossils were found, except for Receptaculites and Columnaria. The reader is referred to Foerste (1912) and Liberty (1954) for a more complete list of the contained fossils. Brachiopods and bryozoa are the most common, but crinoids, conularids, and corals are known in the unit. The formation is correlated with the Bobcaygeon of Central Ontario (Rockland, Hull, Kirkfield) and with the Bony Falls formation of Northern Michigan. On lithic grounds, the Bony Falls is more similar to the Bobcaygeon's lower member at Coboconk, Ontario.

The lithic and faunal sequence above and below the Bobcaygeon leaves no doubt that this unit includes the troublesome Black River-Trenton time boundary. In essence there is a co-mingling of faunal elements, the Trenton ones making their first appearance in the middle strata.

## VERULAM FORMATION

The Verulam formation is the term applied to the "lower Curdsville" beds of Foerste (1912) and the "Unnamed beds" of Liberty (1954). No name has been proposed heretofore for the strata of this unit, which is a distinctive lithogenetic unit lying between the "Cobourg lithology" of the Lindsay and the digitate and sub-limestones of the Bobcaygeon formation. The formation comprises an alternation of carbonate and thin partings of shale and claystone, the whole weathering into thin beds bluish grey in color. The carbonate is bluish-grey, finely crystalline and sublithographic limestone with minor fine bioclastic limestone and finely crystalline argillaceous limestone. An upper unit of grey, medio to coarsely crystalline, bioclastic limestone can be used as a marker. Thickness of the formation is considered to be about 60 feet.

The formation is considered to be moderately fossiliferous with a predominance of brachiopods and bryozoa. The small echinoderm fauna permits a possible correlation with the Hull-Kirkfield with which Kay correlates these strata (1939). The writer correlates the unit with these and lower Sherman Fall of Central Ontario. The unit is the extension of the Verulam Formation of that area and is considered to be the lithic equivalent of the Chandler Falls formation in Northern Michigan.

## LINDSAY FORMATION

The name Lindsay formation is applied to the strata heretofore called "upper Trenton" by Foerste (1912) and Cobourg by Caley (1936) and Sproule (1936). The rock is typically Cobourg lithology but until recently no Cobourg fossils have been found in this unit. The term "Cobourg" is considered to be biostratigraphic in connotation and typical surface and subsurface "Cobourg" lithology is known to occur only in Kay's Cobourg upper member - the Hillier, in Prince Edward County, Kay's type area (1937), insofar as the lithology of strata to be embraced is concerned. Raymond's original intention for the term is obscure.

On Manitoulin Island, this unit varies from 40 to 85 feet in thickness and consists of grey, finely crystalline, argillaceous limestone and grey, sublithographic limestone, with minor finely crystalline dolostone beds. At one locality only, black shale partings occur near the top of the formation. The unit weathers into thin and medium evenly bedded carbonate. A member of brown, medio crystalline, porous dolostone is often developed in the uppermost strata in the Sheguiandah area. In all probability it is this unit in which the Trenton oil was trapped and produced around the turn of the century.

Previously, much has been made of the unconformity at the top of the Cobourg. The Whitby's Collingwood shales overlap this unit to produce an angular unconformity. This phenomena is now considered to be due to "drape" over the irregular Precambrian surface, which we can see in the Sheguiandah area. With the resultant dip, erosion processes could alter the "thickness" of the critical beds; final transgression of the shales overlying this surface would produce angular relationships. Thus erosion was minor, no compression of the Paleozoic section occurred, and the whole may well have occurred near wave-base.

The formation is moderately fossiliferous and includes Tetradium fibratum, Isotelus maximus, and Pseudogygites sp. The occurrence of this last form in black shale partings in highest Lindsay strata, presents the sole clue of at least the uppermost few feet being Cobourg and Edenian in age. Thus the Trentonian-Edenian time-line could possibly be drawn through highest Lindsay strata. The formation's upper few feet are correlated then with the Cobourg's Hillier; the remainder being

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

correlated with the Sherman Fall. Lithically the formation is traced into the "subsurface Cobourg" and is the lithic equivalent of the Groos Quarry formation in Northern Michigan.

## WHITBY FORMATION

The Whitby formation embraces the shales lying above the Simcoe Group carbonates and below the alternating shale and carbonate layers of the Georgian Bay formation. As such it equates with the Bills Creek formation in Northern Michigan.

In Central Ontario, the formation is divisible into three members: a lower-Craigleith member (Liberty, 1955), a middle-Rouge River member (Liberty 1955) and an upper-Camperdown member (new name). This last term is proposed for strata forming the upper division of the Whitby formation and contains a Blue Mountain fauna at its type locality. It consists of bluish-grey and grey shales and can be widely mapped in the area of Camperdown, near Collingwood, Ontario; it can be traced southward to the Toronto area and northward to the Manitoulin Island area. It is underlain by the resistant black shale of the Craigleith member (at the type area, where the Middle-Rouge River member is absent) and is overlain by the shale and hardband sequence of the Georgian Bay formation; the upper contact is drawn at the first carbonate hardband. The type sections are at the mouth of East Meaford Creek and on several creeks in the vicinity of Camperdown. The member is about 160 feet thick in its type area.

On Manitoulin Island, the Craigleith member comprises the resistant, black petroliferous calcareous shale and minor black, sublithographic limestone, of the Collingwood beds. The unit is about 25 feet thick; greater thicknesses have been reported but these are now known to be due to "drape" phenomena. The Craigleith is very fossiliferous and contains graptolites, brachiopods, ostracods and trilobites. The more important ones are: Pseudogygites canadensis, Triarthrus sp., and Glossograptus sp. It is considered that the Trentonian-Edenian time-line should be drawn to include this unit in the Edenian.

The middle-Rouge River member is not present in the Georgian Bay area. The upper-Thornbury member equates only approximately with the Sheguiandah which is a biostratigraphic unit. The member consists of soft and chippy, green-grey and bluish-grey shale and clay shale. The shale is neither calcareous nor petroliferous. The unit is about 130 feet in thickness. The upper contact is drawn at the first carbonate hardband of the Georgian Bay formation. The member is sparsely fossiliferous, with graptolites, brachiopods, and trilobites. Glossograptus and Triarthrus are the most important. Essentially the fauna collected from this member is the Blue Mountain fauna.

## GEORGIAN BAY FORMATION

The Georgian Bay formation comprises the remaining strata below the Manitoulin formation which is Silurian in age. As such, it will be recognized that the Queenston formation is not present in this area and it is now known that its carbonate facies equivalent is present in its place. The Queenston formation is limited to the Bruce Peninsula, south of Tobermory and Cabot Head but north of Ferndale; arbitrary cut-off would be drawn near Ferndale (subsurface data). Biostromes from the northern carbonates (upper member of Georgian Bay formation), are known to trace southwards to interfinger with the Queenston shales.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

The formation is divisible into two members. The lower varies from 150 to 330 feet in thickness and consists of a sequence of shale and hardband alternations. The shale is a blue and grey clay-shale with thicknesses of 3 to 12 feet; the hardbands are dominantly limestone but dolostone does occur. Beds are 0.1 to 0.3 feet in thickness and vary from finely crystalline to finely calcarenitic in texture. Both shale and carbonate are fossiliferous; brachiopods, bryozoa, pelecypods and gastropods are the dominant forms.

The upper member comprises the carbonate beds of Meaford and Kagawong (Foerste, 1912) biostratigraphic connotation. It is the facies equivalent of the Queenston formation, and is 150 feet thick. The lower submember (for such use see Liberty 1963, 1967) is dominantly grey and brown, finely crystalline, argillaceous limestone with thin shale beds (bedding 0.2 to 0.3 feet thick). It is about 50 feet thick and encloses the Gore Bay (coralline) Biostrome in its uppermost few feet. The lower contact is drawn where the shale beds of the lower member become reduced sufficiently in thickness so that this unit is dominantly carbonate in make-up. This submember approximately equates with the Meaford. The upper submember (approximately the Kagawong) is composed of about 100 feet of brown, mottled, finely and very finely crystalline limestone and grey, sublithographic limestone. The "Kagawong dolomite" has only been found on the Wekwemikong Indian Reserve where it is a grey and greenish-grey, finely crystalline dolostone. The Mudge Bay Biostrome is located near the base and the Maple Point Biostrome is located near the top of the unit.

The upper member is fossiliferous, with the lower submember being very fossiliferous. These faunas are upper Ordovician and are reported upon fully by Foerste (1916, 1924) and Liberty (1954). Brachiopods and bryozoa are perhaps most abundant, but pelecypods, corals, and gastropods are in profusion also; Hebertella, Catazyga, Rhynchotrema and Cyrtodonta being perhaps the more important genera. On a lithic basis, the lower member is considered the equivalent of the Ogontz (Stonington formation) of Northern Michigan. In all probability the Big Hill formation is part of the upper submember, on a lithic basis at least. Its correlation with the Kagawong has been seriously questioned by Michigan workers, however.

## MANITOULIN FORMATION

The Manitoulin formation consists of weathered grey, brown and bluish-grey, finely and medio crystalline dolostone, with some dolomitic limestone in both bedded and non-bedded deposits. At a few localities argillaceous carbonate occurs, but chert has only been found at one locality. Non-bedded deposits are considered to be patch reefs (bioherms); they occur at numerous localities and present both vertical and horizontal jointing. The greatest thickness attained is about 70 feet. In contrast, the bedded deposits are considered to be the platform reef (on which the patch reefs have grown), which is the normal Manitoulin formation and is about 20 feet thick. The formation is sparsely fossiliferous at best; but Parmorthis eugeniensis, Coelospira planoconvexa, Brockocystites sp. and Palaeofavosites sp. have been found. The bioherms are considered to be algal in origin, primarily; Palaeophyllum sp. is by far the most abundant coral but has never been seen to make up more than a small part of an entire bioherm. Fossils are usually silicified. The formation is correlated with the Manitoulin of Central Ontario and Northern Michigan - and the Moss Lake formation. [patch reef?]

## STRATIGRAPHIC NOTE

The following classification is not intended to be a rigid one. It is the classification used in Liberty and Bolton's Paleozoic Geology of the Bruce Peninsula (G.S.C. Memoir in press) and by Liberty (1966). Regional studies necessitate this classification as an alternative at least, in order to describe the stratigraphy in report form.

| | |
|---|---|
| Cabot Head formation | St. Edmund member<br>Wingfield member<br>Dyer Bay member<br>Cabot Head (restricted) member |

The St. Edmund listed is the St. Edmund lentille of Williams (1919) and the type section is at Rocky Cove 3 miles west of Cabot Head Lighthouse, on the Bruce Peninsula. The overlying Lockport formation at that locality embraces a lowest unit of thinly-bedded, porcellanous dolostone below the unit of Pentamerus (Fossil Hill formation). Williams (1955), in writing about the Fossil Hill problem, states that: (1) Bolton's St. Edmund did not extend southward from Manitoulin Island to the Bruce Peninsula, and (2) that Williams' St. Edmund did not extend northward from the Bruce into Manitoulin. Bolton's work at the time indicated the Manitoulin Island to be the type section St. Edmund at Rocky Cove. At present, Bolton's St. Edmund includes both units on Manitoulin Island only.

The writer's studies indicate: (1) the presence of Williams' St. Edmund on Manitoulin Island as far west as Meldrum Bay; and (2) the extension of the unnamed lowest Lockport unit at Rocky Cove into and across Manitoulin Island into the Byron and Hendricks formations into Northern Michigan. Accordingly, as the essence of stratigraphy is clarification, the writer has returned to the original definition of St. Edmund (Williams 1919) and proposes the term "Mindemoya formation" for the overlying basal Lockport unit. He originally intended to use the term Burnt Bluff. This term now includes the Lime Island formation, and is no longer applicable.

## CABOT HEAD FORMATION

This map-unit embraces four members and comprises the strata between the top of the Manitoulin formation and the base of the Fossil Hill formation. (not the base of Williams' Lockport formation). The map-unit is about 110 feet thick at the type section of the Cabot Head, Wingfield, and St. Edmund members at Rocky Bay 3 miles west of Cabot Head Lighthouse.

Cabot Head (restricted) member. This member consists of soft, red and green clay-shale with thin, green, sublithographic dolostone beds and gypsum. The reddish color predominates in the upper part; the lower is predominantly greenish. Calculated thickness is about 65 feet in the centre of the Island. In those areas where it is associated with the patch reefs of the Manitoulin formation, it represents an interbiohermal facies. Impressions of ostracods are the only fossils that have been found in this unit.

Dyer Bay member. This member consists of thin bedded, bluish-grey, brownish-grey (and mottled blue, brown, purple and green), finely crystalline dolostone and digitate dolostone. Chert nodules and silicified fossils are common. Thickness of the unit is about 15 feet. Present are ripple marks and shale partings in which the ostracod Zygobolba williamsi has been found. Fossils also include the coral Favosites and the brachiopod Virgiana mayvillensis.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

Wingfield member. Contrary to published descriptions, the type section of the Wingfield shows about 32 feet of ribbon dolostone: thin bedded (0.2') greenish grey and grey, very finely crystalline to sublithographic dolostone with thin interbedded seams of green shale - the whole weathering to an apparent dominant green shale section. On Manitoulin, the green shale seams have decreased sufficiently to produce a greenish weathered dolostone unit, with a minimum thickness of about 30 feet. Chilobolbina punctata and Zygobolba williamsi (ostracods of Clinton age) have been collected. Dyer Bay and Wingfield thicknesses appear complementary (where one thickens the other thins), and the two units present a constant thickness of about 35 to 40 feet.

St. Edmund member. The type section at Rocky Cove shows 8 feet of massive, mottled brown and greyish brown, medio crystalline, mottled, finely and medio crystalline dolostone. It is overlain by 4 feet of soft green shale. On Manitoulin Island, this shale is no longer present and the member is completely dolostone. This member has been identified as a distinct unit from South Bay in the east to Meldrum Bay in the west, at six localities. Whereas the writer has not found the Atrypa parksi, there is one specimen among the many Favosites, that he believes to be Favosites cristatus.

The Cabot Head is considered to have changed completely into green dolostone in Northern Michigan. Whereas the Dyer Bay traces into the Lime Island formation, the Wingfield and St. Edmund (or their equivalents) might be present in the covered interval between the Virgiana beds on shore and lowest Byron-Hendricks on Lime Island, itself.

## MINDEMOYA FORMATION

This term is here proposed for the map-unit of formational rank which lies on the St. Edmund member of the Cabot Head formation, and is in turn overlain by the Fossil Hill formation. It is a lithogenetic unit and is the most distinctive unit in the Niagara Escarpment section on Manitoulin Island. The name is taken from Lake Mindemoya where this unit is well developed.

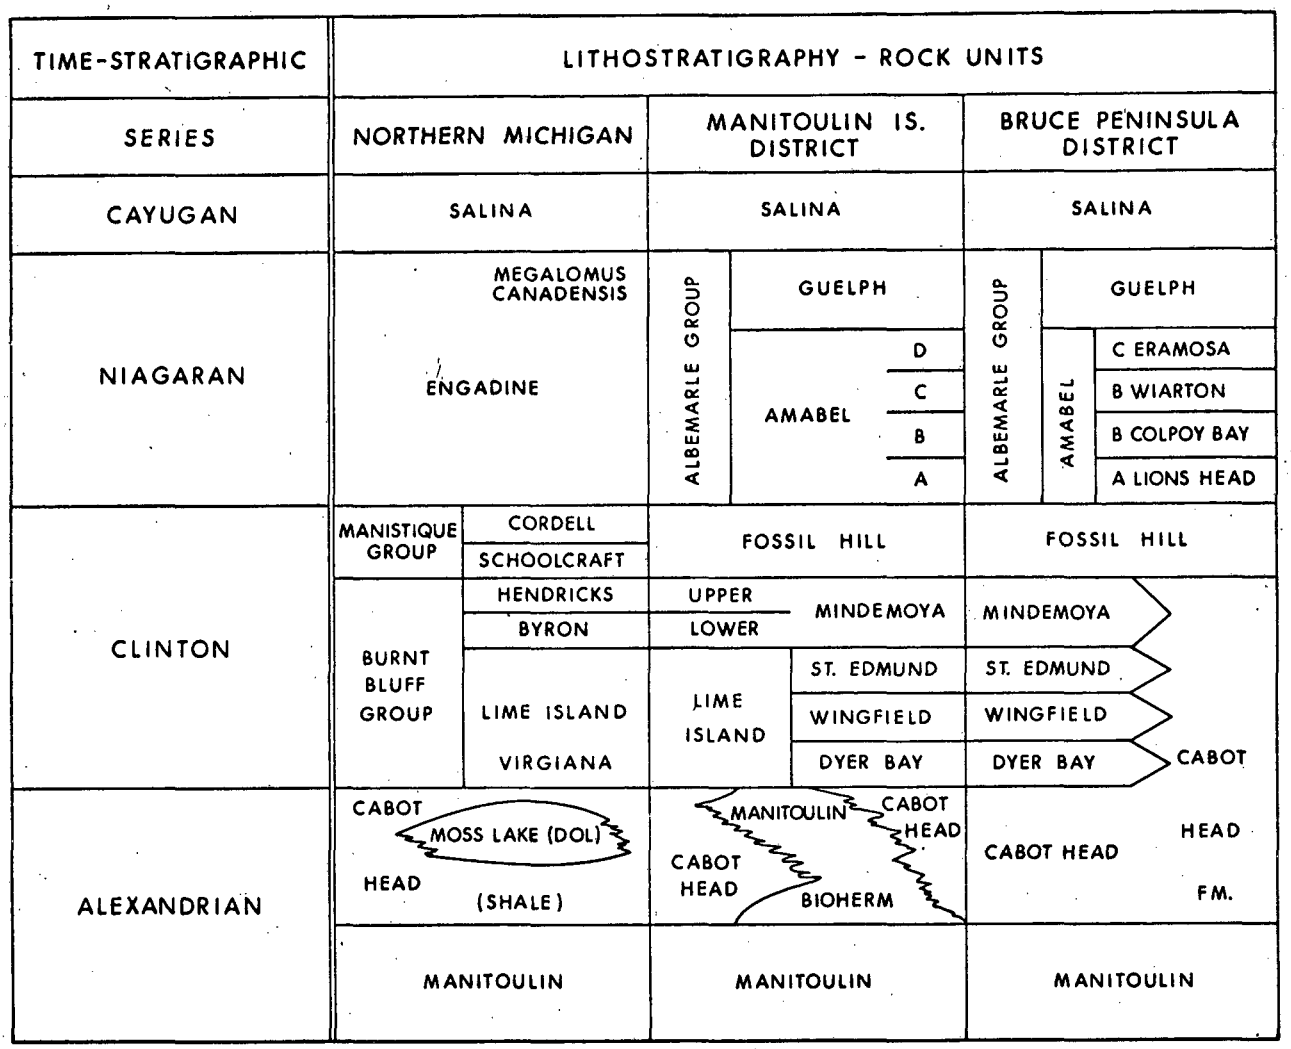
A two-fold subdivision is made: a lower member consisting of thinly bedded and thinly laminated, tan and grey, lithographic and sublithographic porcellaneous dolostone; and an upper member of thin, thick and massive beds of grey and brown sublithographic, lithographic and finely crystalline dolostone, enclosing several 2- to 3-feet-thick biostromes of evenly textured brown, finely crystalline dolostone. The type sections are located: lower member - 5 miles southwest of West Bay village main intersection on a north-south road along the west shore of Lake Mindemoya - a 15-foot cliff section showing the lower contact with the St. Edmund member (Stop 11); upper member - on Spring Bay in the southwest corner of Lake Mindemoya four miles west-northwest of the village of Mindemoya's main intersection - a 16 1/2-foot shore section showing the upper contact with the overlying Fossil Hill formation (Stop 12). The formation is widespread on Manitoulin Island with the upper member being the more prominent; the lower member can be seen at few localities, being easily covered by talus at the base of escarpments. Total thickness varies from 60 feet at the east end to about 100 feet at the west end of the Island.

The lower contact is drawn between the thin bedded and laminated, tan and grey, lithographic and sublithographic dolostone of the Mindemoya and the brown, medio and finely to medio crystalline dolostone of the St. Edmund member. The upper contact is drawn between the medium and heavy, white weathering beds of tan and grey, lithographic, sublithographic, finely crystalline dolomites of the Mindemoya and the overlying dark grey weathering, irregularly bedded, brown, finely and fossiliferous.

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

The formation is sparsely fossiliferous: the upper member is known to contain Rhynochotrema lowi and Stegerhynchus (?) winiskensis (these fossils have not been found lower), and includes Stromatoporoids (Clathrodictyon) and corals (Favosites). It is correlated with and traceable into the Hendricks formation of Northern Michigan. The lower member contains only impressions of smooth ostracods and a single species of Carcinosoma libertyi - an eurypterid. This member is believed to be the lithic equivalent of the Byron formation of Northern Michigan.

## CORRELATION OF SILURIAN FORMATIONS



B.A. LIBERTY 1968

Figure 10

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

## FOSSIL HILL FORMATION

Fossil Hill strata consist of thin and thick, irregularly bedded, dark grey weathering, finely and medio crystalline dolostone. Both biohermal and non-biohermal deposits are known. The lowest 20 feet are generally very fossiliferous and encloses a profusion of Pentamerids. Toward the west end of the Island two layers of Pentamerid profusion are separated by a few feet of sublithographic to very finely crystalline dolostone.

It is above this lower unit, (but not necessarily built on it), that the Fossil Hill biohermal complex is developed, thickness varying between 30 and 115 feet. In this complex, bioherms, flank strata and interbiohermal facies can be distinguished; the bioherms by their massive, non-bedded (horizontal jointing is present) attributes; the interbiohermal facies by their thin beds, chert and very fossiliferous content. Scattered through the latter section there are several thin units of white weathering, light tan, finely crystalline dolostone. Thus the upper biohermal complex is underlain by the lower, thinner, biostromal or platform facies which is considered to be, in the western part of Manitoulin only, the Schoolcraft. This unit is considered to be overlain by the Cordell; the whole being the Manistique formation, of Northern Michigan. Southwards however, Bolton has traced the Fossil Hill from the Bruce Peninsula into the lower Clinton Reynales formation of New York State, (Bolton, 1953, 1957, 1964).

The Fossil Hill formation is exceptionally fossiliferous and has been so noted by all workers. For a more complete list of the fossils that have been found, the reader is referred to Williams (1919) and Bolton (1954, 1957). Perhaps the most common are: Pentamerus oblongus, Favosites favosus, Halysites catenularia, Heliolites elegans, Lyellia americana, Strombodes pentagonus and Arachnophyllum pentagonum.

## AMABEL FORMATION

The Amabel formation is divisible into four lithic units which do not correspond with Bolton's (1957) subdivisions on the Bruce Peninsula. The formation does not equate with the Lockport of Williams (1919) for the Lockport includes the underlying Fossil Hill and Mindemoya formations. The Amabel formation is in reality a reefal complex (Bolton and Liberty, 1955, Liberty, 1966) presenting biostromal, biohermal and interbiohermal units.

The lowest unit, member A, comprises transitional strata from typical Fossil Hill into typical Amabel - grey to white, evenly textured, finely crystalline dolostone. Thickness varies from a few inches to several feet dependent on the location on the bioherm. Member B (Colpoy Bay and Wiarton of Bolton), consists of 30 to 90 feet of both biohermal and biostromal deposits, with the occasional thin interbed of Fossil Hill-looking material. The member is typically grey to white weathering, blue and bluish mottled (streaky), finely to very finely crystalline dolostone. "Bedding" is massive and is in reality horizontal jointing. Porous zones and vugs are not common. Interbiohermal strata (called Eramosa in the past) are thin bedded equivalents of typical Amabel--thin, yellow weathering beds of grey finely crystalline, cherty dolostone (Stop 26). Biohermal strata can be seen on Day 1 at mileage 87.6 (Mindemoya south road-cut) and Day 2 at mileage 47.4 (the new "Slash" road-cut). Member C consists of a knoll-interknoll facies of smaller bioherms. The lithology varies from green to grey, and from sublithographic to finely crystalline dolostone. Thickness is believed to be in the order of 40 feet and the unit can be seen to advantage nearest Providence Bay on the Providence

Document disclosed under the *Access to Information Act* -
Document divulgué en vertu de la *Loi sur l'accès à l'information*

Geol. of Manitoulin Is., 1968

Bay-South Baymouth highway. Member D is rarely seen due to the present erosional surface. It can be seen on Fitzwilliam Island's southeast corner. It is believed to be the reefal equivalent of the typical Eramosa of the Bruce Peninsula. Non-bedded masses are creamy weathering, pink, lithographic and sublithographic dolostone. Flanking bedded deposits vary between 0.2 and 0.5 feet in thickness; the thickness of the member must exceed 40 feet.

Thickness of the Amabel formation is in the order of 150-180 feet where the bioherms are well developed. Flank areas can show a thickness of 50 feet only. The formation can be traced directly into the Engadine formation to the west and into uppermost Lockport to the south of the Bruce Peninsula. The fauna is incompletely known and the reader is referred to Bolton (1957) and his accompanying paper. Favosites, Syringopora, Scutellum, and Pentamerids are known to occur within the formation.

## GUELPH FORMATION

The Guelph formation is nowhere greatly developed on Manitoulin Island; the writer's map (Liberty 1957) shows no distribution for the formation, but mention is made in the text. The formation is believed to attain 30 feet in thickness east of South Baymouth on the Indian Reserve. Only a few feet are present, dependent on the erosion surface, at South Baymouth, as at Stop 27, at Michaels Bay and on Fitzwilliam Island.

Whereas the Guelph formation is also a reefal complex on the Bruce Peninsula, the deposits of this formation are bedded for the most part on Manitoulin. The formation consists of tan, evenly textured, finely crystalline dolostone. Bedding varies from 0.1 to 0.8 feet in thickness and weather brown and scraggy. Occasional calcarenites are developed; dark bituminous lines have been observed; and fossils are few: Stromatoporoids, Favosites, and Eospirifer. The formation is correlated with high Engadine strata - in which Guelph lithology has also been observed.

20019-4 (R3)

AIR MAIL

November 22, 1949.

Dr. Ernest R. Lilley,
Great Lakes Carbon Corporation,
18 East 48th Street,
NEW YORK, N.Y.

Dear Sir: -

Following your telephone call this morning, we are sending to you today two copies of the plans of the northern and southern portions of the eastern peninsula of Manitoulin Island. The plans do not show the areas formerly held by Great Northern Oil Company. Will you please mark on one set of the prints the areas for which you are applying for permits and return the prints with descriptions of the areas sufficiently defined for use in permits and to identify the areas on the ground.

If you so request, application could be made for authority to grant one permit covering the area of 40,000 acres and additional lands for which you might apply lying immediately north of the north boundary of that area. Any separate area would be covered by the limitation of 10,240 acres as provided in the Regulations.

It is desired that you define the areas required as early as possible so that the remainder of the eastern peninsula may be free for other contracts. The present proposal is that your application should be received here by the 30th of ~~April~~ November and that date should be met if possible.

The payment to Ontario may be made from the total rental charges for your permits at 10¢ per acre and, if you so authorize us on sending the money, we will immediately make payment to Ontario and take up their executive minute restoring the oil rights to the Crown Dominion.

000220

Document disclosed under the Access to Information Act
Document divulgué en vertu de la Loi sur l'accès à l'informat

In addition to the prints sent to you today, we are asking the Surveyor General to prepare a copy of the rough sketch of roads which we received, and we will supply it to you as soon as it is available.

Yours truly,

D. J. Allan,
Superintendent,
Reserves & Trusts.

Encls.

FK/JN

666.0-667.0 fine grained dk. grey arg. ls., fossiliferous
667.0-673.1 fine grained dk grey arg. ls. with occassional 6" bed of med. cryst. grey ls.
673.1-680.2 hard fine grained to lithographic br. ls.
680.2-682.7 fine grained grey ls. with some arg. partings
682.7-683.7 med. cryst br. ls.
683.7-686.3 fine to med grained br. ls., some cryst material
686.3-686.9 fine to med. cryst grey ls.
686.9-687.2 sublithographic dk. br. ls.
687.2-696.7 med cryst. grey ls. with grey sh. partings
696.7-697.4 fine to med. grained grey ls.
697.4-707.4 dominantly fine grained grey ls. with sublithogrphic br. beds and a few sh. partings
707.4-712.9 fine grained grey ls. ,uniform and very hard
712.9-717.4 fine grained dk. grey ls.
717.4-727.3 fine grained to sublithographic dk. grey ls.-essentially sub-lithographic
727.3-737.8 sublithographic dk. grey ls.
737.8-738.9 sublithographic dk. br. ls.
738.9-743.4 light br. lithographic ls. with some grey lithographic ls.
743.4-745.9 fine graine to sublithographic dk. br. ls.
745.9-750.0 4.1' missing between 700 and 750
750.0-752.6 med. grained br, ls.
752.6-754.7 sublithographic br. ls.
754.7-758.7 lithographic br. ls.
758.7-760.2 lithographic grey ls.
760.2-761.9 alternating fine grained dk. grey ls. and med. grained grey ls
761.9-763.9 lithographic dk. grey ls.
763.9-765.4 lithographic dk. grey ls.- some sh. partings
765.4-773.5 sublithographic br. ls.
773.5-775.0 1.5' missing between 750 and 775
775.0-776.0 lithographic dk. grey ls.
776.0-779.4 fine grained greyish blue ls.
779.4-780.7 med. grained grey ls. with some crystl grey ls.
780.7-783.7 fine grained grey ls. with some sublithographis ls.
783.7-787.8 fine grained grey and lithographic ls.-about 50-50
787.8-789.9 lithographic br. and grey ls.
789.9-791.4 fine grained greenish grey arg. ls.

Attention: Mr. D. Borton

+ rental - maybe pro-rated $15,000 x 200 / 9,600 ac or slightly higher?

Dear Sir:

We hereby apply for an exploration permit covering 200 acres, specifically described as N 1/2 Lots 5 & 6 Conc. 4 Township of Oneida. We request this to become an extension to the current lease agreement which became effective in 1967.

During the mining operation in the current lease area, it was apparent that some unknown quantity of mineable gypsum reserves exist in the area immediately north of the leased area underlying the property requested in this exploration permit.

If mineable gypsum does exist, practical mining procedures dictate that this material be mined in conjunction with our mining operation now located near the current north boundary. Once this mining unit is relocated to the south and west, it will be uneconomic to move the mining equipment back into this area.

We propose to diamond drill, using core drilling equipment, immediately north of the current lease boundary and drill progressively furthernnorth until the north mining limit is established. For this reason, we cannot state exactly how many holes will be drilled, but would expect to drill 4-10 holes depending on results attained.

Due to the limited area involved, we would ask that any final leased area be up to the entire exploration permit area, dependent, on the existence of suitable gypsum reserves.

We would propose the same terms as determined in our 1967 agreement. Specifically

Nelson Lucas re: Part II - permit - 6 holes - lease 28.3.74 -

1. Royalty payment to be 8.4 cents/ton (the original 7 cents per ton escalated to the current price index) and subject to the same escalation as the 1967 agreement.

2. A payment of $30. per acre to the Band Council for each acre leased.

3. A payment of $100. to the locatee for each hole drilled on their property plus further payment for bona fide property or crop damage.

We would appreciate your early consideration and approval of this request.

Very truly yours,

CANADIAN GYPSUM COMPANY LIMITED,

R. C. Nelson, Works Manager.

Manitoulin Assignment Lsl 2K on 4 Cyp 1942

To Ethridge Alsm Oil Dev Co.
Fo G. McLean.
Dr. Potts + Stiles down 2400'
Rm. Hon Stiles Imperial Bank Calgary.

90' E of W line
3850' S of N Bd.

E. 750. (B) Beg. 2/43
D. 907' on Beg. 2/43 - now Ethridge is going to Lease & drill within 200' S.D. on.

Manitoulin Assignment Lsl 3K on 2. Cyp 1942

To Ethridge Alsm Oil Dev. Co. no 3.
Fo John McCauley no 1.

376' E of W
660' S of P.

Mr Eldridge says the well drilled & about 600
feet by Miles Potts for Muhgan & Stiles/m
Lot 6 Calgary. Other dept, styles went back &
Calgary, Bills first - Eldridge got Holmes/m
Petroleum Contractor & Calgary.
Then there were discrepancy. as depths of hole-
from there were 907' - now (Reg 12/65) but the
true depth 907' - now (Reg 12/65) but the
Depths. taken by last used Terms of drillers detail
add up - about 48' discrepancy. This will
show when depths come to Ottawa Comm

907
48
859

Reg. 11/65
Mr John McCauley says this well
was never drilled, the land was not
even leased. There was talk of
drilling in the neighbourhood but it was
never drilled

# Know all Men by these Presents,

THAT WE, the undersigned Chief and Principal men of

The Wikwemikong Band

of Indians

resident on our Reserve on the unceded portion of Manitoulin Island in the Province of Ontario and Dominion of Canada, for and acting on behalf of the whole people of our said Band in Council assembled, Do hereby release, remise, surrender, quit claim and yield up unto OUR SOVEREIGN LADY THE QUEEN, her Heirs and Successors forever, ALL AND SINGULAR, ~~that certain parcel or tract of land and premises, situate, lying and being in the in the County of and Province of containing by admeasurement be the same more or less and being composed of~~ the petroleum oil and gas within the unceded portion of the Manitoulin Island, together with all the mining privileges necessary for the proper working and obtaining from the ground and carriage of the said oil and gas off the Reserve, and also with permission to erect and maintain buildings and other structures necessary for the prosecution of mining the said oil and gas.

Received duly signed, Witnessed and Sealed by the Council on the 21st June 1968.

Received duly signed, Witnessed and Sealed by the Council on the 21st June 1968.

Form No. 68.

Document disclosed under the *Access to Information Act*
Document divulgué en vertu de la *Loi sur l'accès à l'information*

TO HAVE AND TO HOLD the same unto Her said Majesty THE QUEEN, her Heirs and Successors forever, in trust to dispose of the same to such person or persons, and upon such terms as the Government of the Dominion of Canada may deem most conducive to our welfare and that of our people.

AND upon the further condition that all moneys received from the disposal of said oil and gas ~~thereof~~, shall, after deducting the usual proportion for expenses of management, be paid to us and our descendants as to the Department may seem best in our interest.

AND WE, the said Chief and Principal men of the said Band of Sweetgrass do, on behalf of our people and for ourselves, hereby ratify and confirm, and promise to ratify and confirm, whatever the said Government may do, or cause to be lawfully done, in connection with the disposal of the said oil and gas and of the moneys to be derived therefrom.

Document disclosed under the *Access to Information Act*

DOMINION OF CANADA,
Province of Ontario
County of Algoma
To Wit:

Personally appeared before me, Benjamin W. Ross of the village of Manitowaning in the Province of Ontario Visiting Superintendent of Indian Affairs and William Kinoshamey Chief of the said Band of Indians. of the Manitoulin Island of the Amended Part of the Manitoulin Island for himself says:—

That the annexed Release or Surrender was assented to by a majority of the male members of the said Band of Indians of the Amended Part of the Manitoulin Island of the full age of twenty-one years then present.

That such assent was given at a meeting or council of the said Band summoned for that purpose and according to their Rules.

That he was present at such meeting or council and heard such assent given.

That he was duly authorized to attend such council or meeting by the Superintendent General of Indian Affairs.

That no Indian was present or voted at said council or meeting who was not a member of the Band or interested in the land mentioned in the said Release or Surrender.

And the said Chief William Kinoshamey says:

That the annexed Release or Surrender was assented to by him and a majority of the male members of the said Band of Indians of the full age of twenty-one years then present.

That such assent was given at a meeting or council of the said Band of Indians summoned for that purpose, according to their Rules, and held in the presence of the said Benjamin W. Ross and Himself

That no Indian was present or voted at such council or meeting who was not an habitual resident on the Reserve of the said Band of Indians or interested in the land mentioned in the said Release or Surrender.

That he is a Chief of the said Band of Indians and entitled to vote at the said meeting or council.

# CANADA.

**e Seventh,** *by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas KING, Defender of the Faith, Emperor of India.*

To all to whom these Presents shall come—GREETING:

**Whereas** petroleum and gas in or under or upon the unceded portion of the Grand Manitoulin Island of Ontario in Our Dominion of Canada such portion being an Indian Reserve have been duly surrendered by the Indians of the said reserve together with all the mining privileges necessary for the proper working and extraction from the ground and carriage from the reserve of such petroleum and gas with a view to the disposal of such petroleum and gas for the benefit of such Indians And Whereas Our Governor in Council has duly accepted such surrender

**Whereas The Great Northern Oil Company Limited** a body politic and corporate hereinafter called the grantee has applied for a grant of the petroleum and gas in or under or upon the lands hereinafter mentioned part of the said reserve and of the mining privileges necessary for working and extraction from the ground and carriage from the reserve of such petroleum and gas claiming to be entitled thereto by virtue of certain agreement bearing date the twenty eighth day of December in the year of Our Lord one thousand nine hundred and made between Ourselves represented by the Superintendent General of Indian Affairs of the second part And Whereas its claims having been duly investigated the grantee has been found entitled

Now know ye that We have granted and by these Presents do grant and convey and assure unto the grantee its successors and assigns all the petroleum and gas which shall be found in or under or upon all and singular those tracts of land situate in the unceded portion of Manitoulin Island in the Province of Ontario as follows Firstly commencing at a point due south 9.33½ feet from the intersection of the water's edge of Manitowaning Bay with the divisions of Sheguiandah and Sheguiandah Township easterly across the said Bay the said point being the southwest corner of the said Township thence due east along the south boundary of the said tract 11.70 feet thence due south 9.33½ feet thence due west to the water's edge of the said Bay thence northerly and easterly following the various sinuosities of the shore of the said Bay to the point of commencement containing an area of ten thousand acres be the same more or less excepting thereout and therefrom all that portion of the said tract that may fall within the said described limits

Secondly all that parcel or tract of land and premises situate lying and being in the said unceded portion described as follows commencing at the water's edge of South Bay on the westerly side of the unceded portion at the point where the northerly limit of the said unceded portion intersects the centre line between the seventh and eighth concessions of Tehkummah produced easterly thence due east five miles more or less to the easterly limit of the said unceded portion thence southerly westerly and northerly following all the sinuosities of the shore of the said Island to the point of commencement containing an area of forty thousand acres be the same more or less together with the exclusive right of boring for petroleum and gas and of digging upon and using and occupying so much of the said lands and to such extent as may be necessary for the purposes hereof and the right of erecting upon the said lands and of removing from time to time any necessary buildings machinery works conveniences and appliances for the purposes aforesaid and the right of conveying petroleum and gas through or under the said lands and the right and privilege but not so as to authorize the grantee to use the surface of the said lands for any purpose except for laying pipes for the conveyance of petroleum and gas over through or under any other lands forming part of the said reserve and harbor ports on the shores of the said Island and for the purposes aforesaid any petroleum or gas which may or shall be found in upon or under the said lands as is required for the said petroleum or gas

To have and to hold the said rights and privileges hereby granted unto the grantee its successors and assigns for the term of twenty one years from the date hereof yielding and paying therefor yearly and every year unto Us and Our successors a royalty of eight per cent such as is required and used in connection with taking for and shipping the said petroleum and gas and in addition thereto the like royalty to be levied and collected on the gross output of any and all mills subject to the exception aforesaid in and upon the said lands

Subject to the further conditions That these Presents do not convey to the grantee any surface rights in the said lands or any works involving the exercise of the rights and privileges hereby granted the grantee its successors or assigns shall not be impracticable so to do or when other labour is required and That the grantee its successors or assigns shall not be hindered or delayed unnecessarily in carrying on or operations under the privileges

In Witness Whereof We have caused these Our Letters to be made Patent and the Great Seal of Canada to be hereunto affixed. Witness: Our Trusty and Well-Beloved CHARLES JONES Esquire LSO BA Deputy of Our Right Trusty and Right Well-Beloved Cousin, the Right Honourable Sir Albert Henry George, Earl Grey, Viscount Howick, Baron Grey of Howick, in the County of Northumberland, in the Peerage of the United Kingdom, and a Baronet, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, Etc., Etc., Governor General of Canada.

At Our Government House, in Our City of Ottawa, this day of , in the year of Our Lord, one thousand nine hundred and , and in the

April nine ninth

By Command,
