## IMPORTANT

The REGISTRY is established to serve you but satisfactory service is largely dependent upon your prompt return of files. This file is charged to you and you are responsible for its return; unless you notify the Registry to transfer the charge to another person, the file will remain charged to you until it is returned. **If action cannot be taken within 48 hours B.F. FILE. Do not remove documents from the file.**

### Particulars Re Use of File Cover

- Column 1 – Shows the office or name of the person to whom the file is routed.
- 2 – Shows the reasons for the routing, or the date and identification number of the letter on file requiring your attention.
  - 3 – Shows the date on which the file is routed to the user.
  - 4 – Provides for initials of the person routing or rerouting a file.
  - 5 – Provides space for the user to enter the date of P.A. (put away) when action is completed – OR the letter "T" when the user transfers the file to another person.
  - 6 – Provides space for the user to write the BF (bring forward) date, the date the user wishes the file to be brought back to him.
  - 7 – Provides space for the user to initial the entry when a file is to be P.A.'d, B.F.'d, or "T" transferred.
  - 8 – Provides space for the Registry to enter the date on which the file is returned to the Registry and inspected before being put away.

---

L'objet du SERVICE DES ARCHIVES est de servir, mais la qualité du service est liée au prompt retour des dossiers. Il incombe à la personne au nom de laquelle le présent dossier est inscrit, de le renvoyer au service des archives; à moins qu'elle n'avertisse le service d'inscrire le dossier au nom d'une autre personne, le dossier restera inscrit à son nom, tant qu'il sera en circulation. **Si l'on ne peut s'occuper du dossier dans les 48 heures, indiquer la date de rappel. Ne pas enlever de documents du dossier.**

### Détails concernant l'usage de la chemise

- Colonne 1 – indiquer le bureau ou le nom de la personne vers qui le dossier est acheminé.
- 2 – indiquer les raisons de l'acheminement ou la date et le numéro d'identification de la lettre au dossier dont le destinataire doit s'occuper.
  - 3 – indiquer la date d'acheminement du dossier vers l'utilisateur.
  - 4 – réservée aux initiales de la personne acheminant ou réacheminant le dossier.
  - 5 – réservée à l'inscription de la date de rangement par l'utilisateur, lorsqu'il a fini du dossier – OU à celle de la lettre "T" quand l'utilisateur transmet le dossier à une autre personne.
  - 6 – réservée à l'inscription de la date de rappel, à laquelle l'utilisateur souhaite ravoit le dossier.
  - 7 – réservée aux initiales de l'utilisateur, lorsque le dossier fait l'objet d'un rangement, d'un rappel ou d'une transmission.
  - 8 – réservée au service des archives pour y inscrire la date ou le dossier lui est renvoyé et ou il est examiné avant d'être rangé.

G.A. mh  
2/1X/64

Ottawa 4, August 27, 1964

s.19(1)

Mr. Laing has asked me to reply to your letter of August 13th concerning your interest in Rayrock Mines Limited.

The Minister, although interested in all matters concerning mining in the north, is not in a position to be of assistance in cases of dispute between private interests. These are more properly handled by direct negotiation or by reference to the courts. May I suggest that you obtain legal advice so that you may judge whether further steps are warranted. Should information be required relative to the recording of claims, do not hesitate to inform us. My Department will assist in any way possible.

I am returning the notarial copy of your agreement which you forwarded with your letter to the Minister.

Yours sincerely,

[Redacted]

[Redacted]

*Mr. Laing has asked me to reply to your letter of Aug. 13*  
*My answer is*  
I am answering your letter of August 13th, since Mr. Laing is in the north.  
~~Your letter was about your~~ interest in Rayrock Mines Limited.

*concerning*  
The Minister, although interested in all matters concerning mining in the north, is not in a position to be of assistance in cases of dispute between private interests. These are more properly handled by direct negotiation or by reference to the courts. May I suggest that you obtain legal advice so that you may judge whether further steps are warranted. I do not think that the Minister can be of assistance in such litigation, but if the administration is called upon to produce any information relative to the recording of claims, we shall naturally help all we can.

*information be required relative to the recording of claims, that you should do not hesitate to inform us. My Department will visit in any way possible.*  
-- I am returning the Notarial copy of your agreement [Redacted] which you forwarded with your letter to the Minister.

Yours sincerely,

G.F. Gibson,  
Executive Assistant

Dispute between [redacted] and  
Rayrock Mines Limited

A [redacted] has written to the Minister to request assistance in a  
dispute respecting payment for mineral claims.

s.19(1)

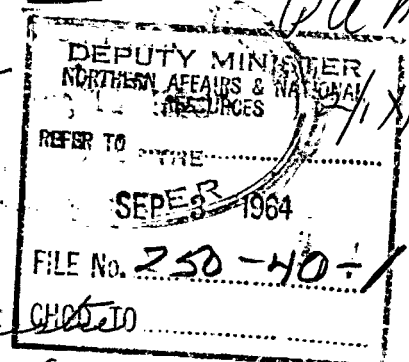

It is known that [redacted] has approached the management of Rayrock Mines Limited on many occasions but since this Company has disclaimed any liability, it is considered unwise to involve our Department in a dispute which should be settled in the courts. Therefore, a reply has been drafted for your signature, advising [redacted] that he should engage a lawyer to determine if his claim is well founded and then he might have his case settled by the courts.

E.A. Côté,  
Deputy Minister

s.19(1)

August 13/64

Ministre of Northern Affairs  
Ottawa

Honorable Minister

Dear that you

are the ministre of northern affairs I am  
sending you a contract which was base  
on the first law of uranium, this  
property has been already in production.

It seem that Rayrock Management are abusing  
of me because of the new law which I don't  
understand because everybody know that ~~new~~  
law was to help everybody.

I am sending you  
a contract that Rayrock Mine agreed to  
respect all obligations. Would you study it  
because I need some advice from your high  
authority

The contract was for the  
property which I discover during the nine  
years that I prospect in the North.  
Has you will see the contract was base  
on the law of that time.

I already had 000931

support of [redacted] in 1951 on the same property the first time they give me trouble and I obtain justice, but I am sorry to hear he is not anymore, so I decide to write you for help and advice to find out were how and who? to address myself to get Rayrock Dune to respect the contract they had with me.

According to the advice that I had receive from [redacted] Lawyer who made the contract for us said that uranium contract receive of the strang of the specific uranium prospect was not transferable or negotiable to another company or another property. Therefor it was understood that if the property came back the contract will be attach to it. The contract obtain on the strang of the mineral prove that on my property for a amount over one million and a half pound of uranium on which my interest was twenty-five cents a pound. We sold the property for a very small cash and no stock, because we want the company to have money to operate. I took the risk on the production. Now they sold the contract without making payment for the right of the property (for the right)

-3-

which payment should have been made six month after production stop on the property has the contract ask for five thousands dollars every six month that the property his idle. Therefore the sold a contract that didn't belong to them... because they sold a contract without telling me nothing about it or without any payment after eighteen month after the property was idle. if it is not a day light robbery I don't know what it is, after producing not quite half million pounds.

Where is the lie?

When they said there was for over a million and a half pound prove on the property and accept by all company and government authority or when they said there was no more uranium after not quite half million pound produce on the property.

When I visited the mine in 1959 it true that the mine was supposed to had stop producing but they refuse me to visit the mine and lock the door the day before I arrived, and I was advise by the man who made all shipment, that they had ship three or even four time more uranium that the rapport they had send to me. He had advise me to investigate and he would be ready to witness in

000933

court for me.

Now I don't know what to think of them, because they don't want to give me my twenty-five cents a pound interest and the contract should have been back to me with the property, because one payment was made ten months after the property was idle.

Naturally they had a good gasconade, can you imagine me a proprietor and the income tax had a stop on all interest on my property and that went on for four years and a half in which time they ruin me completely and according to the lawyer who was advising me and had let me get to all troubles I could not depend myself: that was Paul Coddidy of Bays, he had full power attorney, receiving all money and put in joint account, when I saw that I took Meredith Fleming of Toronto with help me with the tax case but did not help me for the mining lease interest in three years time, and I charge again ten months ago and nothing yet happen.

Counting on you for justice  
With respect.

## *Progress Report*

To the Shareholders:

1962 has been a very active year for your Company. In association with Faraday Uranium Mines Limited a large scale exploration and development program is just getting underway on a silver-lead property in British Columbia. Early in the year a 75 per cent interest was acquired in Elgin Petroleum Corporation Limited, which company has oil reserves in excess of 3,000,000 barrels and should earn a net profit of 2½ million dollars over the next six years. Several exploration projects, in participation with other companies, are well advanced in gold, base metals and oil. Interests are held in prospecting syndicates in several fields across Canada. Your Company holds short term notes in the amount of \$3,000,000 and listed shares in other companies with a book value of \$716,121, and market value of \$613,368. Shares and debentures held in unlisted companies have a book value of \$1,253,790.

Rayrock and Faraday have finalized an agreement with Western Exploration Company and Loma Minerals for an immediate start on an exploration and development program on the Western Exploration silver-lead-zinc property near Silverton, B.C. A 3,500,000 share company is being formed on the 42-claim property. The two vendor companies will receive a total of 1,000,000 shares and in addition each will be paid \$25,000 out of operating profits from production after Rayrock and Faraday have been reimbursed for all preproduction costs.

For an exploration expenditure of \$200,000 Rayrock and Faraday will each receive 1,000,000 shares of the new company. Funds required to bring the property into production would be loaned in equal amounts by Rayrock and Faraday at 6 per cent interest, which funds would be repaid out of first operating profits. Rayrock and Faraday will manage the operation and have full use of existing mining and surface equipment and buildings. A 150 tons per day mill is in operating condition on the Western Exploration property and can be acquired on a rental purchase basis.

An adit, called the Hecla Drive, will explore the Mammoth shear zone at an elevation of 4,200 feet above sea level. In 1954 a portion of the Mammoth zone was developed at elevation 5,050 feet and 16,000 tons were mined averaging 35 ounce silver, 9 per cent lead and 5 per cent zinc per ton. Geological interpretations indicate that this is the top of an ore zone that should extend below the 4,200 foot elevation with increased ore widths through this vertical distance. The maximum length of the Hecla Drive will be 4,500 feet. Ore may be encountered any time after the first 900 feet advance, from which point the adit will be driven along the strike of the Mammoth zone.

Rayrock holds a 75 per cent interest with an option to purchase the remaining 25 per cent in Elgin Petroleum Corporation Limited. Elgin owns outright 65 producing wells and has a 50 per cent working

interest with Canada Cities Service Petroleum Corporation in an additional 22 producing wells in the Rodney field, Elgin County, Ontario.

A water injection program was commenced June 1st by Elgin and Canada Cities Service on their adjoining acreage. The program included the drilling of seven water injection wells, a water supply well and the installation of water purifying, pumping and distribution facilities on the Elgin acreage. This will result in a very substantial increase in production within the next two months.

In Northern Saskatchewan, Rayrock, in partnership with Augustus Exploration Limited, is engaged in an extensive exploration program on a large withdrawal area. Work was resumed June 1st, after the winter drilling program, and some 12,500 feet of drilling have been completed. At Tower Lake mineralized zones with very encouraging gold values over widths varying from 35 feet to 75 feet were found along a length of 300 feet. The extension of these zones to the west is under Tower Lake and further drilling will be resumed after freezeup. At Center Lake, three miles to the west, drilling of the strong quartz-filled shear zone returned only low gold values. Detailed geological mapping is nearing completion along seven to eight miles of the east-west lineament on which the Tower and Center Lake showings are located.

Rayrock is continuing its participation in the underground exploration and development program at the Taurcanis Mines' gold property located 150 miles northeast of the Town of Yellowknife, Northwest Territories. There are 200,000 tons of positive ore averaging 0.80 ounces per ton or 312,000 tons of positive and indicated ore averaging 0.67 ounces per ton to the 1225 foot level. The main Matthews Vein and the No. 2 Vein are open at depth. The property is a pioneering operation in the Barren Lands. Costs have been lowered each year through improvements in transportation and further cost reductions can be expected for power and heating. Current ore reserves are only sufficient to return the cost of placing the property into production from this stage. Independent consulting advice is to proceed to production at a rate of 200 tons per day. The Directors are now considering such a decision.

Rayrock has important shareholdings in Redstone Mines Limited which is engaged in an extensive exploration program in the Redstone River area in the Northwest Territories. The season's program was concentrated on three contiguous prospecting permits covering 820 square miles. New mineralized zones were found, and discoveries made last year were extended. Preliminary prospecting and geological work show that favourable structures and rock formations continue several miles to the north.

In the south permit area on Plateau Mountain three roughly parallel sedimentary formations, separated by 20 to 40 feet of unmineralized beds, contain interesting secondary copper mineralization over widths varying from 2 feet to 9.5 feet and which have been traced for a length of about three miles. Surface sampling of two of the mineralized beds along this length assay about 3 per cent copper over an average width of 5 feet. Additional detailed geological mapping, sampling and exploration in the primary zone of mineralization is necessary to determine the importance of this area.

Diamond drilling of the McBean gossan, 38 miles southeast of Plateau Mountain, did not intersect primary sulfides below the gossan zone. However, several new lead-zinc discoveries in the immediate area were protected by the staking of 36 additional claims.

From 17 to 35 miles north of Plateau Mountain several copper, copper-silver, and lead-silver mineralized zones have been located within the 5 to 6 mile wide folded and faulted zone that has been traced in a north-south direction for more than 75 miles. These individual mineral occurrences are not of economic size, but such widespread mineralization warrants additional detailed prospecting and geological work on the favourable belt.

The Icon Syndicate, in which Rayrock continued its equal partnership with Barymin Exploration, Gunnar Mining and Anglo-Huronian, is conducting a detailed exploration program in the Frotet Lake area, Quebec. Geophysical surveying on the claim groups adjoining the Falconbridge property was completed and diamond drilling of the interesting anomalies is now in progress. An additional 100 claims were staked to protect other

mineralized areas located during prospecting. Final reports are not available from the five prospecting and geological parties which are still in the field.

Rayrock is active in the Northwest Territories through participation in the Big Four and Earl-Jack Syndicates. Exploration work has been concentrated in the Contwoyto Lake area, some 250 miles northeast of the Town of Yellowknife.

The Big Four Syndicate staked a total of 144 claims south and west of the Canadian Nickel gold property. A number of intensely folded, gold bearing amphibolite beds were discovered, similar to those found on the Canadian Nickel ground. Further work next season is required to determine their importance.

The Earl-Jack Syndicate has two groups, totalling 45 claims, adjoining the Canadian Nickel property on the west. The Companies comprising this syndicate also optioned the Bay group of 54 claims adjoining the New Athona property on the east. Surface prospecting and 1,135 feet of diamond drilling gave assays up to 2.24 ounces gold per ton but no economic deposits have been located.

A 25 per cent interest is held in one producing oil well in the Crossfield area, Alberta, and small interests are held in eight producing wells in the Redwater field, Alberta. A 40 per cent working interest is held in a well planned for drilling this month in the North Alameda area, Saskatchewan.

Through other prospecting syndicates Rayrock has interests in Labrador, Quebec, Ontario, British Columbia and Nevada, U.S.A. Reports from these syndicates are awaited pending completion of the season's work.

Delivery of uranium concentrates has been completed under Rayrock's agreement with Gunnar Mining Limited and Eldorado Mining and Refining Limited.

RAYROCK MINES LIMITED

J. C. BYRNE,

17757-N/6

Requisition 17757,  
Prefabricated Two-bedroom House  
Rayrock, Northwest Territories.

21 May, 1959

We recently called for tenders on a quantity of nine two-bedroom bungalows for the Northern Administration Branch for delivery to locations in the eastern Arctic during the coming season. In a submission to Treasury Board on May 15th, we recommended that purchase for these houses be authorized from the firm of Arctic Units Limited, Toronto. They were the third lowest bidder, and the two low firms were not quoting to specifications. It is expected that we will obtain Treasury Board approval for this purchase at the regular meeting of the Board this week.

In addition to the above, we have now received a requisition requesting a similar two-bedroom house for the accommodation of a teacher at Rayrock, N.W.T., to be shipped via Waterways, Alta. Rather than call for tenders again, we would recommend that the order for this house be awarded to the same Company, Arctic Units Limited, who will be building the nine units referred to above.

If this meets with your approval, may we have authority, please, to place an order with Arctic Units Limited in the amount of \$13,691.00, F.O.B. Factory.
